## **Dystrobrevin beta (DTNB) Mouse Monoclonal Antibody [Clone ID: OTI3A12] – TA504326S**

#### Background:

This gene encodes dystrobrevin beta, a component of the dystrophin-associated protein complex (DPC). The DPC consists of dystrophin and several integral and peripheral membrane proteins, including dystroglycans, sarcoglycans, syntrophins and dystrobrevin alpha and beta. The DPC localizes to the sarcolemma and its disruption is associated with various forms of muscular dystrophy. Dystrobrevin beta is thought to interact with syntrophin and the DP71 short form of dystrophin. Alternatively spliced transcript variants encoding different isoforms have been identified. HEK293T cells transfected with either [RC203798] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-DTNB antibody ([TA504326]), and then analyzed by flow cytometry.

Anti-DTNB mouse monoclonal antibody ([TA504326]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY DTNB ([RC203798]).

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY DTNB (Cat# [RC203798], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-DTNB(Cat# [TA504326]). Positive lysates [LY405251] (100ug) and [LC405251] (20ug) can be purchased separately from OriGene.
