

Product datasheet for **TA504792M**

Mannose Phosphate Isomerase (MPI) Mouse Monoclonal Antibody [Clone ID: OTI4E7]

Product data:

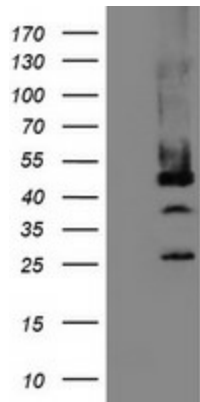

Product Type:	Primary Antibodies
Clone Name:	OTI4E7
Applications:	FC, IHC, WB
Recommended Dilution:	WB 1:2000, IHC 1:150, FLOW 1:100
Reactivity:	Human, Rat
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human MPI(NP_002426) produced in HEK293T cell.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	0.73 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	46.5 kDa
Gene Name:	mannose phosphate isomerase
Database Link:	NP_002426 Entrez Gene 300741 Rat Entrez Gene 4351 Human P34949
Background:	Phosphomannose isomerase catalyzes the interconversion of fructose-6-phosphate and mannose-6-phosphate and plays a critical role in maintaining the supply of D-mannose derivatives, which are required for most glycosylation reactions. Mutations in the MPI gene were found in patients with carbohydrate-deficient glycoprotein syndrome, type Ib. [provided by RefSeq]
Synonyms:	CDG1B; PMI; PMI1

Protein Families: ES Cell Differentiation/IPS

Protein Pathways: Amino sugar and nucleotide sugar metabolism, Fructose and mannose metabolism, Metabolic pathways

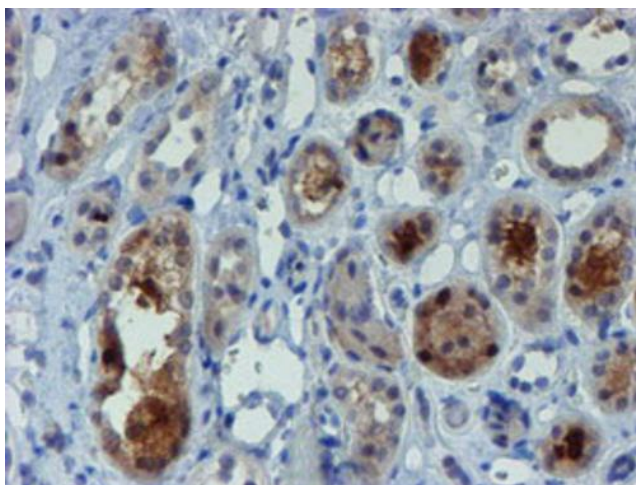

Product images:

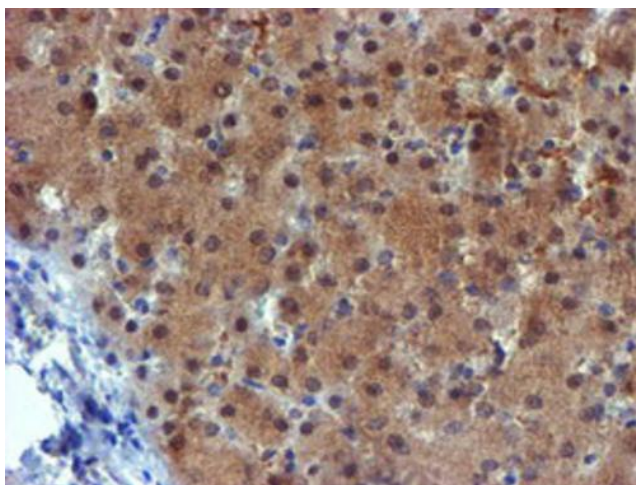

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY MPI ([RC208134], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-MPI. Positive lysates [LY419324] (100ug) and [LC419324] (20ug) can be purchased separately from OriGene.

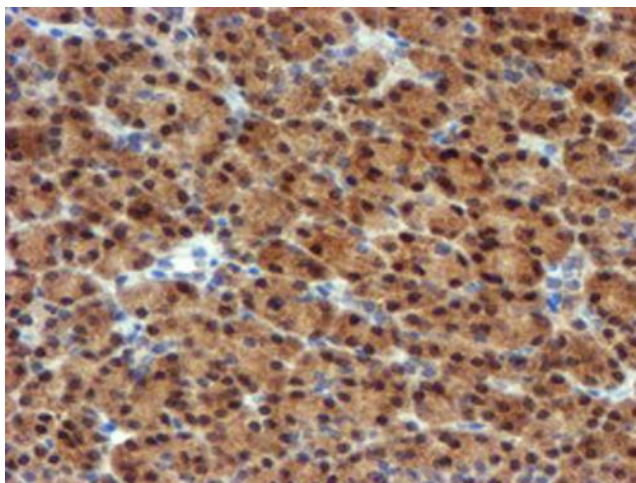

Equivalent amounts of cell lysates (10 ug per lane) of wild-type Hela cells (WT, Cat# LC810HELA) and MPI-Knockout Hela cells (KO, Cat# [LC810147]) were separated by SDS-PAGE and immunoblotted with anti-MPI monoclonal antibody [TA504792]. Then the blotted membrane was stripped and reprobed with anti-HSP90AB1 antibody ([TA500494]) as a loading control (1:200).

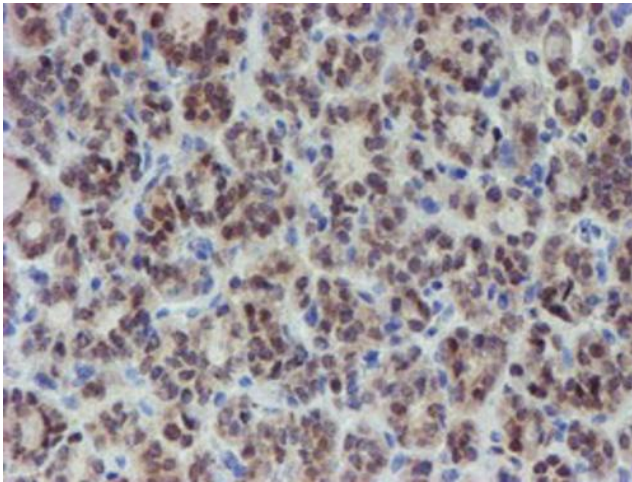

Immunohistochemical staining of paraffin-embedded Human Kidney tissue within the normal limits using anti-MPI mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

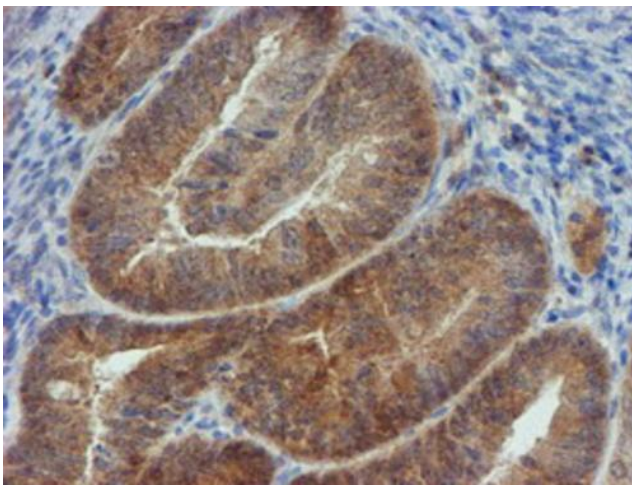

Immunohistochemical staining of paraffin-embedded Human liver tissue within the normal limits using anti-MPI mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

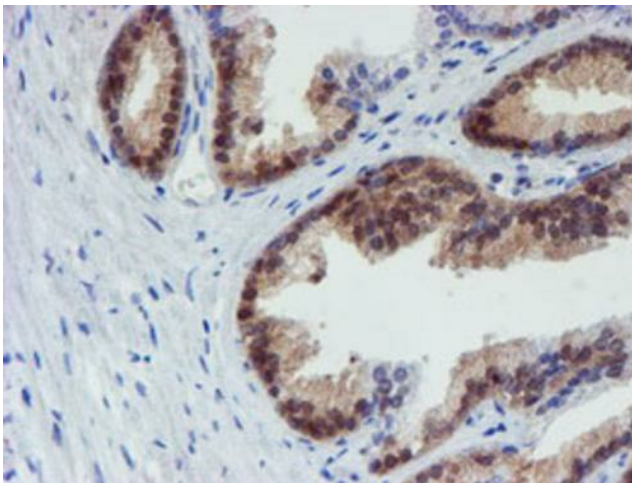

Immunohistochemical staining of paraffin-embedded Human pancreas tissue within the normal limits using anti-MPI mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

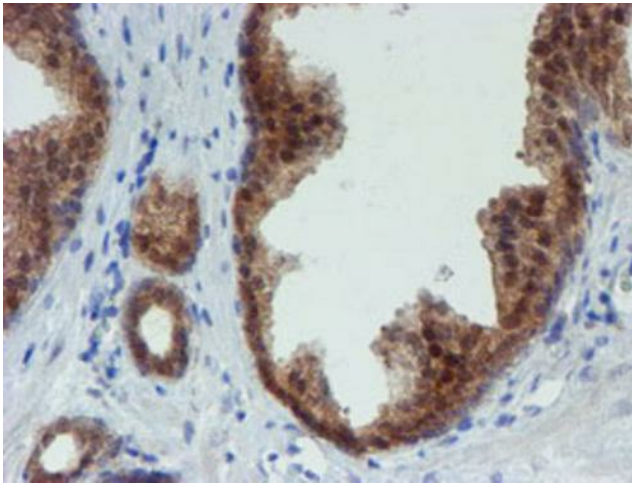

Immunohistochemical staining of paraffin-embedded Carcinoma of Human thyroid tissue using anti-MPI mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

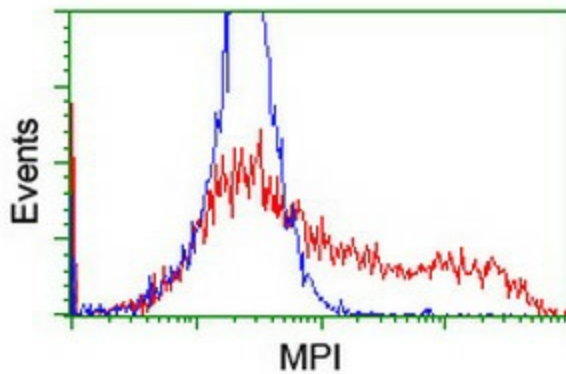

Immunohistochemical staining of paraffin-embedded Adenocarcinoma of Human endometrium tissue using anti-MPI mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffin-embedded Human prostate tissue within the normal limits using anti-MPI mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffin-embedded Carcinoma of Human prostate tissue using anti-MPI mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

HEK293T cells transfected with either [RC208134] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-MPI antibody ([TA504792]), and then analyzed by flow cytometry.
