Product datasheet for TA506078BM

ERG Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI6A4]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI6A4
Applications:	IF, IHC, WB
Recommended Dilution:	WB 1:4000, IHC 1:150, IF 1:100
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human ERG(NP_891548) produced in HEK293T cell.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol.
Concentration:	0.5 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	HRP
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	53.7 kDa
Gene Name:	ETS transcription factor ERG
Database Link:	<u>NP_891548</u> <u>Entrez Gene 13876 MouseEntrez Gene 170909 RatEntrez Gene 2078 Human</u> <u>P11308</u>

Serigene ERG Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI6A4] – TA506078BM

Background:This gene encodes a member of the erythroblast transformation-specific (ETS) family of
transcriptions factors. All members of this family are key regulators of embryonic
development, cell proliferation, differentiation, angiogenesis, inflammation, and apoptosis.
The protein encoded by this gene is mainly expressed in the nucleus. It contains an ETS DNA-
binding domain and a PNT (pointed) domain which is implicated in the self-association of
chimeric oncoproteins. This protein is required for platelet adhesion to the subendothelium,
inducing vascular cell remodeling. It also regulates hematopoesis, and the differentiation and
maturation of megakaryocytic cells. This gene is involved in chromosomal translocations,
resulting in different fusion gene products, such as TMPSSR2-ERG and NDRG1-ERG in
prostate cancer, EWS-ERG in Ewing's sarcoma and FUS-ERG in acute myeloid leukemia.
Multiple alternatively spliced transcript variants encoding different isoforms have been
identified. [provided by RefSeq, Jan

Protein Families:

erg-3; p55

Druggable Genome, Transcription Factors

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY ERG ([RC208093], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-ERG. Positive lysates [LY403650] (100ug) and [LC403650] (20ug) can be purchased separately from OriGene.

Immunohistochemical staining of paraffinembedded Human Ovary tissue within the normal limits using anti-ERG mouse monoclonal antibody. (Heat-induced epitope retrieval by 10mM citric buffer, pH6.0, 120°C for 3min, [TA506078])
