EGFR Mouse Monoclonal Antibody [Clone ID: OTI3H2]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI3H2

Applications: IF, IHC, WB

Recommended Dilution: WB 1:4000, IHC 1:150, IF 1:100

Reactivity: Human, Mouse, Rat

Host: Mouse Isotype: IgG1

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human EGFR(NP_958440) produced in HEK293T

cel

Formulation: PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.

Concentration: 1 mg/ml

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 42.4 kDa

Gene Name: epidermal growth factor receptor

Database Link: NP 958440

EGFR Mouse Monoclonal Antibody [Clone ID: OTI3H2] - TA506224M

Background: The protein encoded by this gene is a transmembrane glycoprotein that is a member of the

protein kinase superfamily. This protein is a receptor for members of the epidermal growth factor family. EGFR is a cell surface protein that binds to epidermal growth factor. Binding of the protein to a ligand induces receptor dimerization and tyrosine autophosphorylation and leads to cell proliferation. Mutations in this gene are associated with lung cancer. Multiple alternatively spliced transcript variants that encode different protein isoforms have been

found for this gene. [provided by RefSeq, Jul 2010]

Synonyms: ERBB; ERBB1; ERRP; HER1; mENA; NISBD2; PIG61

Protein Families: Adult stem cells, Cancer stem cells, Druggable Genome, ES Cell Differentiation/IPS, Protein

Kinase, Secreted Protein, Stem cell relevant signaling - JAK/STAT signaling pathway,

Transmembrane

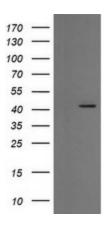

Protein Pathways: Adherens junction, Bladder cancer, Calcium signaling pathway, Colorectal cancer, Cytokine-cytokine receptor interaction, Dorso-ventral axis formation, Endocytosis, Endometrial cancer,

Epithelial cell signaling in Helicobacter pylori infection, ErbB signaling pathway, Focal adhesion, Gap junction, Glioma, GnRH signaling pathway, MAPK signaling pathway,

Melanoma, Non-small cell lung cancer, Pancreatic cancer, Pathways in cancer, Prostate

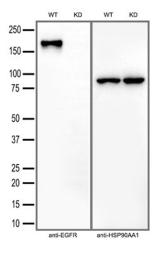

cancer, Regulation of actin cytoskeleton

Product images:

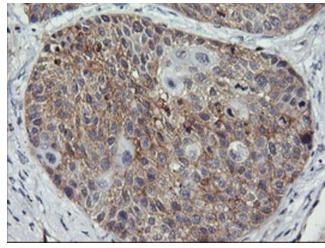

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY EGFR (Cat# [RC214877], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-EGFR (Cat# [TA506224]). Positive lysates [LY404515] (100ug) and [LC404515] (20ug) can be purchased separately from OriGene.

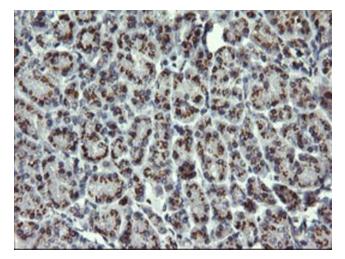

Equivalent amounts of cell lysates (30 ug per lane) of wild-type HepG2 cells(WT) and EGFR-Knockdown HepG2 cells(KD) were separated by SDS-PAGE and immunoblotted with anti-EGFR monoclonal antibody [TA506224](1:2500). Then the blotted membrane was stripped and reprobed with anti-HSP90AA1 antibody as a loading control.

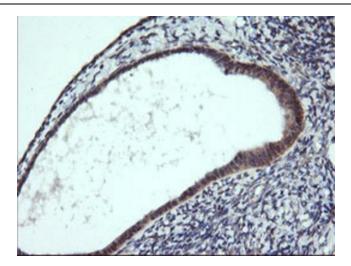

Immunohistochemical staining of paraffinembedded Carcinoma of Human lung tissue using anti-EGFR mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

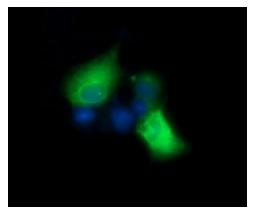

Immunohistochemical staining of paraffinembedded Human pancreas tissue within the normal limits using anti-EGFR mouse monoclonal antibody. ([TA506224]). Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffinembedded Human endometrium tissue within the normal limits using anti-EGFR mouse monoclonal antibody. ([TA506224]). Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Anti-EGFR mouse monoclonal antibody ([TA506224]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY EGFR ([RC214877]).
