| Product Type:           | Primary Antibodies   |
|-------------------------|--|
| Clone Name:             | OTI3E6   |
| Applications:           | IF, WB   |
| Recommended Dilution:   | WB 1:400~4000  |
| Reactivity:             | Human  |
| Host:                   | Mouse  |
| lsotype:                | lgG2a  |
| Clonality:              | Monoclonal   |
| Immunogen:              | Full length human recombinant protein of human BID(NP_001187) produced in HEK293T cell.  |
| Formulation:            | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.   |
| Concentration:          | 1 mg/ml  |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography<br>(protein A/G)   |
| Conjugation:            | Unconjugated   |
| Storage:                | Store at -20°C as received.  |
| Stability:              | Stable for 12 months from date of receipt.   |
| Predicted Protein Size: | 21.8 kDa   |
| Gene Name:              | BH3 interacting domain death agonist   |
| Database Link:          | <u>NP_001187</u><br><u>Entrez Gene 637 Human</u><br><u>P55957</u>  |
| Background:             | This gene encodes a death agonist that heterodimerizes with either agonist BAX or<br>antagonist BCL2. The encoded protein is a member of the BCL-2 family of cell death<br>regulators. It is a mediator of mitochondrial damage induced by caspase-8 (CASP8); CASP8<br>cleaves this encoded protein, and the COOH-terminal part translocates to mitochondria<br>where it triggers cytochrome c release. Multiple alternatively spliced transcript variants have<br>been found, but the full-length nature of some variants has not been defined. [provided by<br>RefSeq, Jul 2008] |

|                   | D Mouse Monoclonal Antibody [Clone ID: OTI3E6] – TA506763S  |
|-------------------|---|
| Synonyms:         | FP497   |
| Protein Families: | Druggable Genome  |
| Protein Pathways: | Alzheimer's disease, Amyotrophic lateral sclerosis (ALS), Apoptosis, Natural killer cell<br>mediated cytotoxicity, p53 signaling pathway, Pathways in cancer, Viral myocarditis |

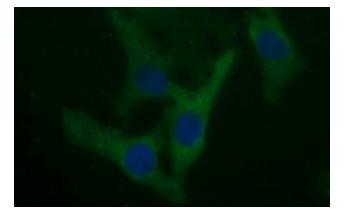

### **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY BID ([RC207261], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-BID. Positive lysates [LY420074] (100ug) and [LC420074] (20ug) can be purchased separately from OriGene.

Western blot analysis of extracts (35ug) from 9 different cell lines by using anti-BID monoclonal antibody (HepG2: human; HeLa: human; SVT2: mouse; A549: human; COS7: monkey; Jurkat: human; MDCK: canine; PC12: rat; MCF7: human).

Immunofluorescent staining of HeLa cells using anti-BID mouse monoclonal antibody ([TA506763]).
