Product datasheet for TA506813S

Placental lactogen (CSH1) Mouse Monoclonal Antibody [Clone ID: OTI2A2]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI2A2
Applications:	IF, WB
Recommended Dilution:	WB 1:1000, IF 1:100
Reactivity:	Human
Host:	Mouse
lsotype:	lgG2a
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human CSH1(NP_072166) produced in HEK293T cell.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Gene Name:	chorionic somatomammotropin hormone 1
Database Link:	<u>NP_072166</u> <u>Entrez Gene 1442 Human</u> <u>P0DML2</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

CRIGENE Placental lactogen (CSH1) Mouse Monoclonal Antibody [Clone ID: OTI2A2] – TA506813S

Background:The protein encoded by this gene is a member of the somatotropin/prolactin family of
hormones and plays an important role in growth control. The gene is located at the growth
hormone locus on chromosome 17 along with four other related genes in the same
transcriptional orientation; an arrangement which is thought to have evolved by a series of
gene duplications. Although the five genes share a remarkably high degree of sequence
identity, they are expressed selectively in different tissues. Alternative splicing generates
additional isoforms of each of the five growth hormones, leading to further diversity and
potential for specialization. This particular family member is expressed mainly in the placenta
and utilizes multiple transcription initiation sites. Expression of the identical mature proteins
for chorionic somatomammotropin hormones 1 and 2 is upregulated during development,
although the ratio of 1 to 2 increases by term. Mutations in this gene result in placental
lactogen deficiency and Silver-Russell syndrome. [provided by RefSeq, Jul 2008]

Synonyms: Protein Families: CSA; CSH2; CSMT; FLJ75407; PL

Protein Families: Druggable Genome

Protein Pathways: Jak-STAT signaling pathway, Neuroactive ligand-receptor interaction

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY CSH1 ([RC223244], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-CSH1. Positive lysates [LY411615] (100ug) and [LC411615] (20ug) can be purchased separately from OriGene.

Anti-CSH1 mouse monoclonal antibody ([TA506813]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY CSH1 ([RC223244]).
