# Product datasheet for TA506891M

## Claudin 6 (CLDN6) Mouse Monoclonal Antibody [Clone ID: OTI2H1]

### **Product data:**

| Product Type:           | Primary Antibodies                                                                                              |
|-------------------------|-----------------------------------------------------------------------------------------------------------------|
| Clone Name:             | OTI2H1                                                                                                          |
| Applications:           | IF, WB                                                                                                          |
| Recommended Dilution:   | WB 1:500, IF 1:100                                                                                              |
| Reactivity:             | Human, Mouse, Rat                                                                                               |
| Host:                   | Mouse                                                                                                           |
| lsotype:                | lgG1                                                                                                            |
| Clonality:              | Monoclonal                                                                                                      |
| Immunogen:              | Full length human recombinant protein of human CLDN6(NP_067018) produced in HEK293T cell.                       |
| Formulation:            | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.                                            |
| Concentration:          | 1 mg/ml                                                                                                         |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography<br>(protein A/G)    |
| Conjugation:            | Unconjugated                                                                                                    |
| Storage:                | Store at -20°C as received.                                                                                     |
| Stability:              | Stable for 12 months from date of receipt.                                                                      |
| Predicted Protein Size: | 23.1 kDa                                                                                                        |
| Gene Name:              | claudin 6                                                                                                       |
| Database Link:          | <u>NP_067018</u><br><u>Entrez Gene 54419 MouseEntrez Gene 287098 RatEntrez Gene 9074 Human</u><br><u>P56747</u> |

#### Claudin 6 (CLDN6) Mouse Monoclonal Antibody [Clone ID: OTI2H1] – TA506891M

Background:Tight junctions represent one mode of cell-to-cell adhesion in epithelial or endothelial cell<br/>sheets, forming continuous seals around cells and serving as a physical barrier to prevent<br/>solutes and water from passing freely through the paracellular space. These junctions are<br/>comprised of sets of continuous networking strands in the outwardly facing cytoplasmic<br/>leaflet, with complementary grooves in the inwardly facing extracytoplasmic leaflet. This gene<br/>encodes a component of tight junction strands, which is a member of the claudin family. The<br/>protein is an integral membrane protein and is one of the entry cofactors for hepatitis C<br/>virus. The gene methylation may be involved in esophageal tumorigenesis. This gene is<br/>adjacent to another family member CLDN9 on chromosome 16. [provided by RefSeq, Aug<br/>2010]

Synonyms:

claudin 6; OTTHUMP00000159248

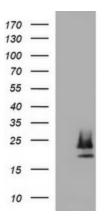

Protein Families:

Transmembrane

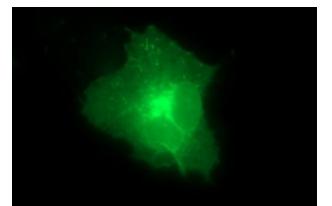

Protein Pathways:

Cell adhesion molecules (CAMs), Leukocyte transendothelial migration, Tight junction

#### **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY CLDN6 (Cat# [RC200744], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-CLDN6(Cat# [TA506891]). Positive lysates [LY412034] (100ug) and [LC412034] (20ug) can be purchased separately from OriGene.

Anti-CLDN6 mouse monoclonal antibody ([TA506891]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY CLDN6 ([RC200744]).
