Product datasheet for TA506893AM

Claudin 6 (CLDN6) Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI5D2]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI5D2
Applications:	WB
Recommended Dilution:	WB 1:500
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human CLDN6(NP_067018) produced in HEK293T cell.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	0.5 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Biotin
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	23.1 kDa
Gene Name:	claudin 6
Database Link:	<u>NP_067018</u> <u>Entrez Gene 54419 MouseEntrez Gene 287098 RatEntrez Gene 9074 Human</u> <u>P56747</u>

	Claudin 6 (CLDN6) Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI5D2] – TA506893AM
Background:	Tight junctions represent one mode of cell-to-cell adhesion in epithelial or endothelial cell sheets, forming continuous seals around cells and serving as a physical barrier to prevent solutes and water from passing freely through the paracellular space. These junctions are comprised of sets of continuous networking strands in the outwardly facing cytoplasmic leaflet, with complementary grooves in the inwardly facing extracytoplasmic leaflet. This gene encodes a component of tight junction strands, which is a member of the claudin family. The protein is an integral membrane protein and is one of the entry cofactors for hepatitis C virus. The gene methylation may be involved in esophageal tumorigenesis. This gene is adjacent to another family member CLDN9 on chromosome 16. [provided by RefSeq, Aug 2010]
Synonyms:	claudin 6; OTTHUMP00000159248
Protein Families:	Transmembrane
Protein Pathway	s: Cell adhesion molecules (CAMs), Leukocyte transendothelial migration, Tight junction

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY CLDN6 ([RC200744], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-CLDN6. Positive lysates [LY412034] (100ug) and [LC412034] (20ug) can be purchased separately from OriGene.
