

Product datasheet for **TA507019M**

HERPUD1 Mouse Monoclonal Antibody [Clone ID: OT11A2]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OT11A2
Applications:	IF, IHC, WB
Recommended Dilution:	WB 1:400~4000, IHC 1:150, IF 1:100
Reactivity:	Human, Rat, Mouse
Host:	Mouse
Isotype:	IgG2a
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human HERPUD1(NP_001010989) produced in HEK293T cell.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	43.4 kDa
Gene Name:	homocysteine inducible ER protein with ubiquitin like domain 1
Database Link:	NP_001010989 Entrez Gene 85430 Rat Entrez Gene 9709 Human Q15011

Background:

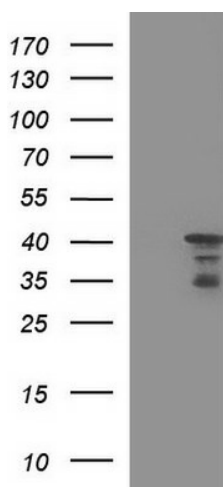

The accumulation of unfolded proteins in the endoplasmic reticulum (ER) triggers the ER stress response. This response includes the inhibition of translation to prevent further accumulation of unfolded proteins, the increased expression of proteins involved in polypeptide folding, known as the unfolded protein response (UPR), and the destruction of misfolded proteins by the ER-associated protein degradation (ERAD) system. This gene may play a role in both UPR and ERAD. Its expression is induced by UPR and it has an ER stress response element in its promoter region while the encoded protein has an N-terminal ubiquitin-like domain which may interact with the ERAD system. This protein has been shown to interact with presenilin proteins and to increase the level of amyloid-beta protein following its overexpression. Alternative splicing of this gene produces multiple transcript variants encoding different isoforms. The full-length nature of all transcript variants has not been determined. [provided by RefSeq, Jan 2013]

Synonyms:

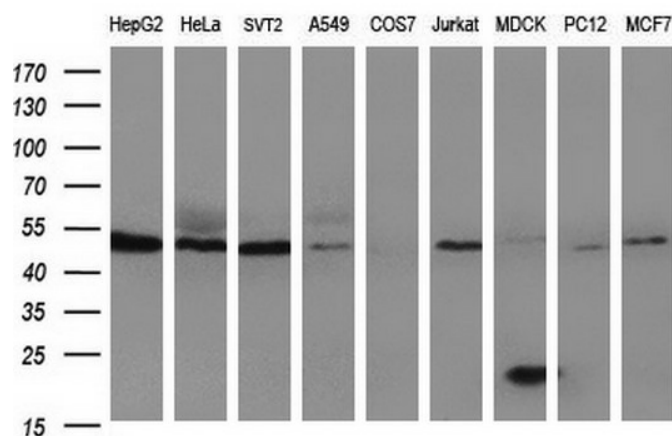

HERP; Mif1; SUP

Protein Families:

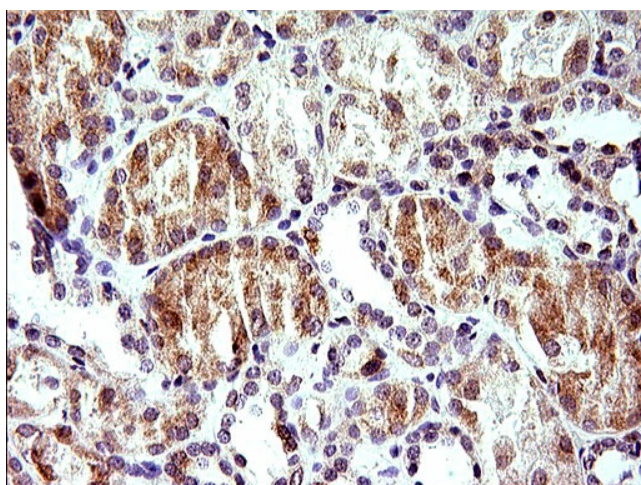

Druggable Genome

Product images:

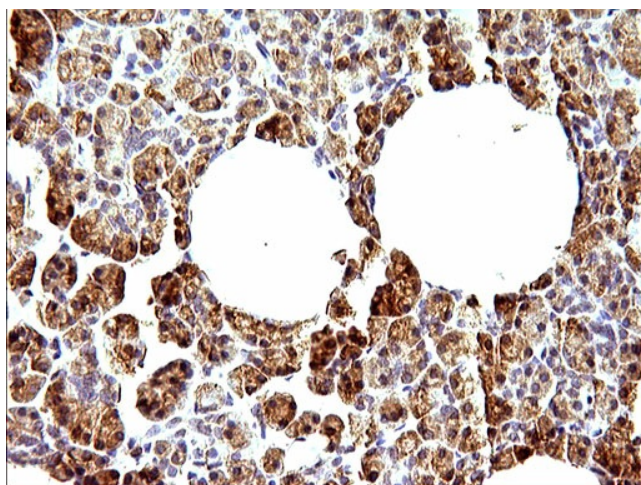

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY HERPUD1 (Cat# [RC200693], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-HERPUD1(Cat# [TA507019]). Positive lysates [LY423260] (100ug) and [LC423260] (20ug) can be purchased separately from OriGene.

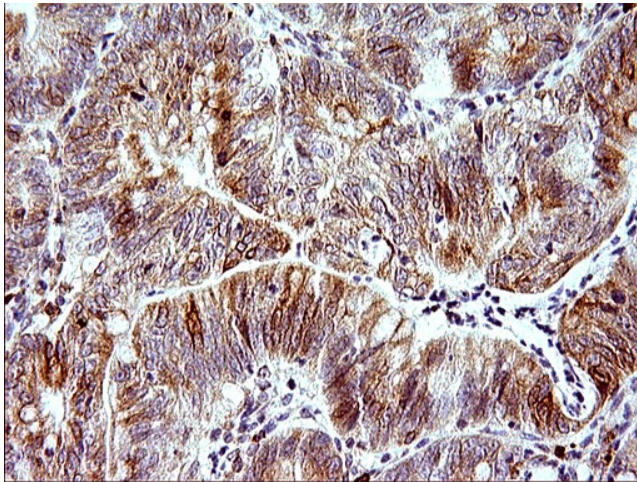

Western blot analysis of extracts (35ug) from 9 different cell lines by using anti-HERPUD1 monoclonal antibody (HepG2: human; HeLa: human; SVT2: mouse; A549: human; COS7: monkey; Jurkat: human; MDCK: canine; PC12: rat; MCF7: human).

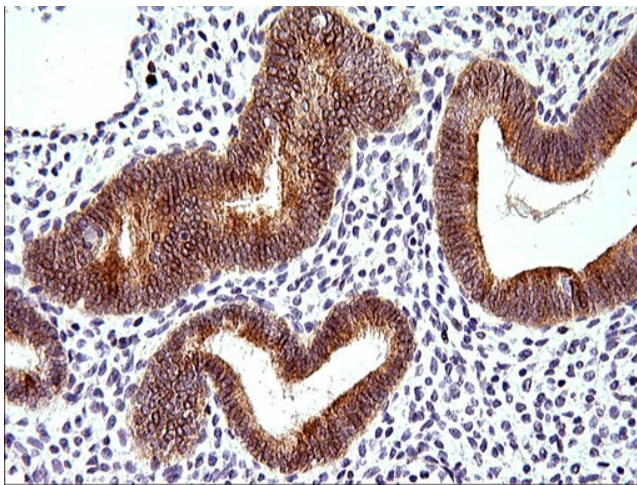

Immunohistochemical staining of paraffin-embedded Human Kidney tissue within the normal limits using anti-HERPUD1 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

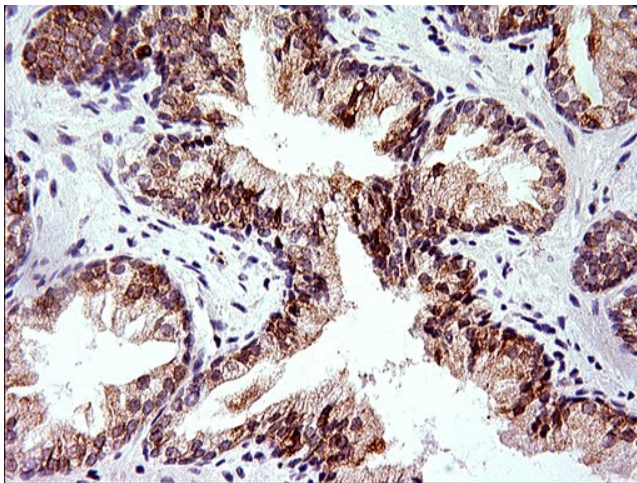

Immunohistochemical staining of paraffin-embedded Human pancreas tissue within the normal limits using anti-HERPUD1 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

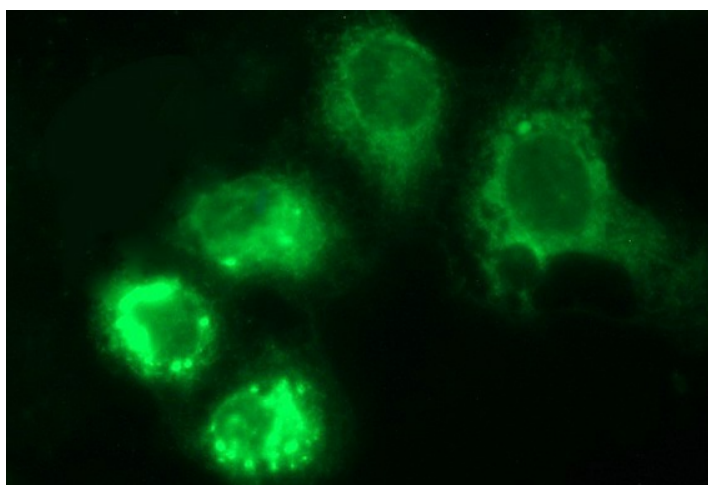

Immunohistochemical staining of paraffin-embedded Carcinoma of Human pancreas tissue using anti-HERPUD1 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffin-embedded Human endometrium tissue within the normal limits using anti-HERPUD1 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffin-embedded Human prostate tissue within the normal limits using anti-HERPUD1 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Anti-HERPUD1 mouse monoclonal antibody ([TA507019]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY HERPUD1 ([RC200693]).
