

Product datasheet for **TA507071BM**

MT (MCAT) Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI2G1]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI2G1
Applications:	IF, WB
Recommended Dilution:	WB 1:1000 -1:4000, IF 1:100
Reactivity:	Human
Host:	Mouse
Isotype:	IgG2a
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human MCAT(NP_775738) produced in HEK293T cell.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol.
Concentration:	0.5 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	HRP
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	40.6 kDa
Gene Name:	malonyl-CoA-acyl carrier protein transacylase
Database Link:	NP_775738 Entrez Gene 27349 Human Q8IVS2
Background:	The protein encoded by this gene is found exclusively in the mitochondrion, where it catalyzes the transfer of a malonyl group from malonyl-CoA to the mitochondrial acyl carrier protein. The encoded protein may be part of a fatty acid synthase complex that is more like the type II prokaryotic and plastid complexes rather than the type I human cytosolic complex. Alternative splicing results in multiple transcript variants encoding different isoforms. [provided by RefSeq, Mar 2012]

Synonyms: fabD; FASN2C; MCT; MT; NET62

Protein Pathways: Fatty acid biosynthesis, Metabolic pathways

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY MCAT ([RC207943], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-MCAT. Positive lysates [LY406620] (100ug) and [LC406620] (20ug) can be purchased separately from OriGene.

Western blot analysis of extracts (35ug) from 9 different cell lines by using anti-MCAT monoclonal antibody at 1:400 dilution (HepG2: human; HeLa: human; SVT2: mouse; A549: human; COS7: monkey; Jurkat: human; MDCK: canine; PC12: rat; MCF7: human).

Immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY MCAT ([RC207943]) using Anti-MCAT mouse monoclonal antibody ([TA507071]) at 1:100 dilution.
