GATA6 Rabbit Monoclonal Antibody [Clone ID: OTIR5F2]

Product data:

Product Type: Primary Antibodies

Clone Name: OTIR5F2

Applications: WB

Recommended Dilution: WB 1:5000

Reactivity: Human, Mouse, Rat

Host: Rabbit Isotype: IgG

Clonality: Monoclonal

Immunogen: Human recombinant protein fragment of human GATA6 (NP_005248) produced in E.coli.

Formulation: PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.

Concentration: 1 mg/ml

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

Storage: Shipped at -20°C or with ice packs, Upon delivery store at -20°C. Dilute in PBS(pH7.3) if

necessary. Stable for 12 months from date of receipt. Avoid repeated freeze-thaws.

Predicted Protein Size: 59.9 kDa

Gene Name: GATA binding protein 6

Database Link: NP 005248

Q92908

Background: This gene is a member of a small family of zinc finger transcription factors that play an

important role in the regulation of cellular differentiation and organogenesis during

vertebrate development. This gene is expressed during early embryogenesis and localizes to endo- and mesodermally derived cells during later embryogenesis and thereby plays an important role in gut, lung, and heart development. Mutations in this gene are associated

with several congenital defects. [provided by RefSeq, Mar 2012]

Protein Families: Embryonic stem cells, ES Cell Differentiation/IPS, Transcription Factors
