

Product datasheet for **TA594209S**

AAV2 Rabbit Monoclonal Antibody [Clone ID: OTIR1D8]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTIR1D8
Applications:	WB
Recommended Dilution:	WB1:2000
Reactivity:	Adeno-Associated Virus 2
Host:	Rabbit
Isotype:	IgG
Clonality:	Monoclonal
Immunogen:	AAV2 capsids
Formulation:	PBS (PH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Shipped at -20°C or with ice packs, Upon delivery store at -20°C. Dilute in PBS(pH7.3) if necessary. Stable for 12 months from date of receipt. Avoid repeated freeze-thaws.
Predicted Protein Size:	100 kDa
Background:	AAV vectors are promising delivery tools for human gene therapy. AAV is a single-stranded DNA parvovirus with a 4.7 kb genome composed of the rep and cap genes flanked by inverted terminal repeats (ITRs). The rep gene encodes non-structural proteins involved in viral replication, packaging, and genomic integration, whereas the cap gene codes for structural proteins (VP1, VP2, VP3) that assemble to form the viral capsid, which serves as the viral gene delivery vehicle.
