Product datasheet for TA800395AM

Epoxide hydrolase (EPHX1) Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI3A10]

Product data:

| Product Type: | Primary Antibodies |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------|
| Clone Name: | OTI3A10 |
| Applications: | IHC, WB |
| Recommended Dilution: | WB 1:2000, IHC 1:150 |
| Reactivity: | Human, Monkey |
| Host: | Mouse |
| lsotype: | lgG1 |
| Clonality: | Monoclonal |
| Immunogen: | Human recombinant protein fragment corresponding to amino acids 21-230 of human EPHX1 (NP_000111) produced in E.coli. |
| Formulation: | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide. |
| Concentration: | 0.5 mg/ml |
| Purification: | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G) |
| Conjugation: | Biotin |
| Storage: | Store at -20°C as received. |
| Stability: | Stable for 12 months from date of receipt. |
| Predicted Protein Size: | 52.8 kDa |
| Gene Name: | epoxide hydrolase 1 |
| Database Link: | <u>NP_000111</u> <u>Entrez Gene 700180 MonkeyEntrez Gene 2052 Human</u> <u>P07099</u> |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

| | Epoxide hydrolase (EPHX1) Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI3A10] – TA800395AM |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Background: | Epoxide hydrolase is a critical biotransformation enzyme that converts epoxides from the degradation of aromatic compounds to trans-dihydrodiols which can be conjugated and excreted from the body. Epoxide hydrolase functions in both the activation and detoxification of epoxides. Mutations in this gene cause preeclampsia, epoxide hydrolase deficiency or increased epoxide hydrolase activity. Alternatively spliced transcript variants encoding the same protein have been found for this gene. [provided by RefSeq, Dec 2008] |
| Synonyms: | EPHX; EPOX; HYL1; MEH |
| Protein Families | : Druggable Genome, Protease |
| Protein Pathway | vs: Metabolism of xenobiotics by cytochrome P450 |
