Product datasheet for TA800703AM

ALK Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI1H2]

Product data:

| Product Type: | Primary Antibodies |
|-------------------------|---|
| Clone Name: | OTI1H2 |
| Applications: | LMNX, WB |
| Recommended Dilution: | WB 1:2000 |
| Reactivity: | Human, Mouse, Rat |
| Host: | Mouse |
| lsotype: | lgG1 |
| Clonality: | Monoclonal |
| Immunogen: | Human recombinant protein fragment corresponding to amino acids 1060-1620 of human ALK (NP_004295) produced in SF9 cell. |
| Formulation: | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide. |
| Concentration: | 0.5 mg/ml |
| Purification: | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G) |
| Conjugation: | Biotin |
| Storage: | Store at -20°C as received. |
| Stability: | Stable for 12 months from date of receipt. |
| Predicted Protein Size: | 176.3 kDa |
| Gene Name: | anaplastic lymphoma receptor tyrosine kinase |
| Database Link: | <u>NP_004295</u> <u>Entrez Gene 11682 MouseEntrez Gene 266802 RatEntrez Gene 238 Human</u> <u>Q9UM73</u> |

Scrigene ALK Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI1H2] – TA800703AM

Background:This gene encodes a receptor tyrosine kinase, which belongs to the insulin receptor
superfamily. This protein comprises an extracellular domain, an hydrophobic stretch
corresponding to a single pass transmembrane region, and an intracellular kinase domain. It
plays an important role in the development of the brain and exerts its effects on specific
neurons in the nervous system. This gene has been found to be rearranged, mutated, or
amplified in a series of tumours including anaplastic large cell lymphomas, neuroblastoma,
and non-small cell lung cancer. The chromosomal rearrangements are the most common
genetic alterations in this gene, which result in creation of multiple fusion genes in
tumourigenesis, including ALK (chromosome 2)/EML4 (chromosome 3), ALK/RANBP2
(chromosome 2), ALK/ATIC (chromosome 2), ALK/KIF5B (chromosome 10), ALK/CLTC
(chromosome 17), ALK/TPM4 (chromosome 19), and ALK/MSN (chromosome X). [provided by
RefSeq, Jan 2011]

Synonyms: CD246; NBLST3

Protein Families:

Product images:

Druggable Genome, Protein Kinase

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY ALK ([RC222485], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-ALK. Positive lysates [LY418072] (100ug) and [LC418072] (20ug) can be purchased separately from OriGene.
