Product datasheet for TA800729

Progesterone Receptor (PGR) Mouse Monoclonal Antibody [Clone ID: OTI1G7]

Product data:

Product Type:	Primary Antibodies	
Clone Name:	Clone Name: OTI1G7	
Applications:	plications: WB	
Recommended Dilution:	led Dilution: WB 1:2000	
Reactivity:	Human	
Host:	t: Mouse	
lsotype:	otype: lgG1	
Clonality:	onality: Monoclonal	
Immunogen:	munogen: Full length human recombinant protein of human PGR (NP_000917) produced in HEK293T cell.	
Formulation:	nulation: PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.	
Concentration:	1 mg/ml	
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)	
Conjugation:	Unconjugated	
Storage:	rage: Store at -20°C as received.	
Stability:	ability: Stable for 12 months from date of receipt.	
Predicted Protein Size:	edicted Protein Size: 98.8 kDa	
Gene Name:	progesterone receptor	
Database Link:	<u>NP_000917</u> <u>Entrez Gene 5241 Human</u> <u>P06401</u>	

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	Progesterone Receptor (PGR) Mouse Monoclonal Antibody [Clone ID: OTI1G7] – TA800729
Background:	This gene encodes a member of the steroid receptor superfamily. The encoded protein mediates the physiological effects of progesterone, which plays a central role in reproductive events associated with the establishment and maintenance of pregnancy. This gene uses two distinct promotors and translation start sites in the first exon to produce two isoforms, A and B. The two isoforms are identical except for the additional 165 amino acids found in the N- terminus of isoform B and mediate their own response genes and physiologic effects with little overlap. [provided by RefSeq, Jan 2011]
Synonyms:	NR3C3; PR
Protein Families	: Druggable Genome, Nuclear Hormone Receptor, Transcription Factors
Protein Pathway	vs: Oocyte meiosis, Progesterone-mediated oocyte maturation

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY PGR ([RC221303], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-PGR. Positive lysates [LY424456] (100ug) and [LC424456] (20ug) can be purchased separately from OriGene.

Western blot analysis of extracts (35ug) from T47D cells by using anti-PGR monoclonal antibody (1:500).
