

## Product datasheet for **TA800966BM**

### **P Glycoprotein (ABCB1) Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI3H7]**

#### **Product data:**

|                       |  |
|-----------------------|--|
| Product Type:         | Primary Antibodies   |
| Clone Name:           | OTI3H7   |
| Applications:         | WB   |
| Recommended Dilution: | WB 1:2000  |
| Reactivity:           | Human, Mouse, Rat  |
| Host:                 | Mouse  |
| Isotype:              | IgG1   |
| Clonality:            | Monoclonal   |
| Immunogen:            | Human recombinant protein fragment corresponding to amino acids 347-710 of human ABCB1 (NP_000918) produced in SF9 cell.             |
| Formulation:          | PBS (pH 7.3) containing 1% BSA, 50% glycerol.  |
| Concentration:        | 0.5 mg/ml  |
| Purification:         | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)                            |
| Conjugation:          | HRP  |
| Storage:              | Store at -20°C as received.  |
| Stability:            | Stable for 12 months from date of receipt.   |
| Gene Name:            | ATP binding cassette subfamily B member 1  |
| Database Link:        | <a href="#">NP_000918</a><br><a href="#">Entrez Gene 170913 Rat</a> <a href="#">Entrez Gene 5243 Human</a><br><a href="#">P08183</a> |

**Background:**

The membrane-associated protein encoded by this gene is a member of the superfamily of ATP-binding cassette (ABC) transporters. ABC proteins transport various molecules across extra- and intra-cellular membranes. ABC genes are divided into seven distinct subfamilies (ABC1, MDR/TAP, MRP, ALD, OABP, GCN20, White). This protein is a member of the MDR/TAP subfamily. Members of the MDR/TAP subfamily are involved in multidrug resistance. The protein encoded by this gene is an ATP-dependent drug efflux pump for xenobiotic compounds with broad substrate specificity. It is responsible for decreased drug accumulation in multidrug-resistant cells and often mediates the development of resistance to anticancer drugs. This protein also functions as a transporter in the blood-brain barrier. [provided by RefSeq, Jul 2008]

**Synonyms:**

ABC20; CD243; CLCS; GP170; MDR1; p-170; P-GP; PGY1

**Protein Families:**

Druggable Genome, ES Cell Differentiation/IPS, Transmembrane

**Protein Pathways:**

ABC transporters

**Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or fragment (347-710 AA) of ABCB1 (Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-ABCB1.

SF9 cells lysate (5 ug, left lane) and SF9 cells lysate expressing human recombinant protein fragment (5 ug, right lane) corresponding to amino acids 995-1280 of human ABCB1 (NP\_000918) were separated by SDS-PAGE and immunoblotted with anti-ABCB1.
