# Product datasheet for TA801318S

## Vimentin (VIM) Mouse Monoclonal Antibody [Clone ID: OTI1D3]

### **Product data:**

| Product Type:           | Primary Antibodies   |
|-------------------------|--|
| Clone Name:             | OTI1D3   |
| Applications:           | IF, WB   |
| Recommended Dilution:   | WB 1:2000  |
| Reactivity:             | Human, Mouse, Rat  |
| Host:                   | Mouse  |
| lsotype:                | lgG2a  |
| Clonality:              | Monoclonal   |
| Immunogen:              | Full length human recombinant protein of human VIM (NP_003371) produced in E.coli.                           |
| Formulation:            | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.   |
| Concentration:          | 1 mg/ml  |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography<br>(protein A/G) |
| Conjugation:            | Unconjugated   |
| Storage:                | Store at -20°C as received.  |
| Stability:              | Stable for 12 months from date of receipt.   |
| Predicted Protein Size: | 53.5 kDa   |
| Gene Name:              | vimentin   |
| Database Link:          | <u>NP_003371</u><br>Entrez Gene 22352 MouseEntrez Gene 81818 RatEntrez Gene 7431 Human<br>P08670             |

# Signal Vimentin (VIM) Mouse Monoclonal Antibody [Clone ID: OTI1D3] - TA801318S Background: This gene encodes a member of the intermediate filament family. Intermediate filamentents,

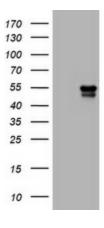

along with microtubules and actin microfilaments, make up the cytoskeleton. The protein encoded by this gene is responsible for maintaining cell shape, integrity of the cytoplasm, and stabilizing cytoskeletal interactions. It is also involved in the immune response, and controls the transport of low-density lipoprotein (LDL)-derived cholesterol from a lysosome to the site of esterification. It functions as an organizer of a number of critical proteins involved in attachment, migration, and cell signaling. Mutations in this gene causes a dominant, pulverulent cataract. [provided by RefSeq, Jun 2009]

#### Synonyms: CTRCT30; HEL113

**Protein Families:** 

ES Cell Differentiation/IPS

Western blot analysis of extracts (35ug) from 4 different cell lines by using anti-VIM monoclonal antibody (1:500).

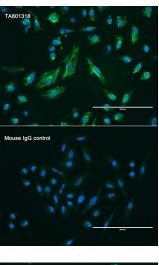

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

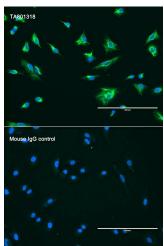

Western blot analysis of extracts (35ug) from 2 different cell lines by using anti-VIM monoclonal antibody (1:500).

Immunofluorescent staining of NIH/3T3 cells using anti-VIM mouse monoclonal antibody ([TA801318], top) or mouse IgG control (below). Nuclear were labeled with Hoechst 33342 (blue). This figure shows negative staining of this antibody (1:200).

Immunofluorescent staining of paraffinembedded K562 cell pellets using anti-VIM mouse monoclonal antibody ([TA801318], top) or mouse IgG control (below). Nuclear were labeled with Hoechst 33342 (blue). (Heat-induced epitope retrieval by 1mM EDTA in 10mM Tris buffer (pH8.5) at 120°C for 2.5 min) (1:200).
