# Product datasheet for TA802077S

# Kallikrein 2 (KLK2) Mouse Monoclonal Antibody [Clone ID: OTI5D6]

## **Product data:**

Product Type:	Primary Antibodies
Clone Name:	OTI5D6
Applications:	IHC, WB
Recommended Dilution:	WB 1:2000, IHC 1:150
Reactivity:	Human
Host:	Mouse
lsotype:	lgG2b
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 25-261 of human KLK2 (NP_005542) produced in SF9 cell.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	28.5 kDa
Gene Name:	kallikrein related peptidase 2
Database Link:	<u>NP_005542</u> <u>Entrez Gene 3817 Human</u> <u>P20151</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### Scherken Stallikrein 2 (KLK2) Mouse Monoclonal Antibody [Clone ID: OTI5D6] – TA802077S

DDK mAb

Background: This gene encodes a member of the grandular kallikrein protein family. Kallikreins are a subgroup of serine proteases that are clustered on chromosome 19. Members of this family are involved in a diverse array of biological functions. The protein encoded by this gene is a highly active trypsin-like serine protease that selectively cleaves at arginine residues. This protein is primarily expressed in prostatic tissue and is responsible for cleaving pro-prostate-specific antigen into its enzymatically active form. This gene is highly expressed in prostate tumor cells and may be a prognostic maker for prostate cancer risk. Alternate splicing results in both coding and non-coding transcript variants. [provided by RefSeq, Jan 2012]

#### Synonyms: hGK-1; hK2; KLK2A2

**Protein Families:** 

Druggable Genome, Protease

### **Product images:**

KLK2 lysate: RC202667 KLK3 lysate: RC202740 HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY KLK2 (Cat# [RC202667], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-KLK2(Cat# [TA802077]). Positive lysates [LY417229] (100ug) and [LC417229] (20ug) can be purchased separately from OriGene.

Western blot analyses for the cross-reactivity between KLK2 and KLK3 overexpression lysate. The results indicate that KLK3 overexpressed lysate is not getting detected by the anti-KLK2 antibody ([TA802077])
