Product datasheet for TA802628M

BRCA1 Mouse Monoclonal Antibody [Clone ID: OTI2A5]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI2A5
Applications:	WB
Recommended Dilution:	WB 1:2000
Reactivity:	Human
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 1151-1473 of human BRCA1 (NP_009225) produced in E.coli.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Gene Name:	BRCA1, DNA repair associated
Database Link:	<u>NP_009227</u> <u>Entrez Gene 672 Human</u> <u>P38398</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

GRIGENE BRCA1 Mouse Monoclonal Antibody [Clone ID: OTI2A5] – TA802628M

Background:This gene encodes a nuclear phosphoprotein that plays a role in maintaining genomic
stability, and it also acts as a tumor suppressor. The encoded protein combines with other
tumor suppressors, DNA damage sensors, and signal transducers to form a large multi-
subunit protein complex known as the BRCA1-associated genome surveillance complex
(BASC). This gene product associates with RNA polymerase II, and through the C-terminal
domain, also interacts with histone deacetylase complexes. This protein thus plays a role in
transcription, DNA repair of double-stranded breaks, and recombination. Mutations in this
gene are responsible for approximately 40% of inherited breast cancers and more than 80%
of inherited breast and ovarian cancers. Alternative splicing plays a role in modulating the
subcellular localization and physiological function of this gene. Many alternatively spliced
transcript variants, some of which are disease-associated mutations, have been described for
this gene, but the full-length natures of only some of these variants has been identified. [provided
by RefSeq, May 2009]SuncerversionBBCA1/BBCA2 containing complex, subunit 1: BBCA1; BBCA1; BBCC1; broast and ovarian cancers

Synonyms:BRCA1/BRCA2-containing complex, subunit 1; BRCAI; BRCC1; breast and ovarian cancer
susceptibility protein 1; breast cancer 1, early onset; BROVCA1; IRIS; PSCP; RNF53Protein Families:Druggable Genome, Transcription Factors

Protein Pathways: Ubiquitin mediated proteolysis

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY BRCA1 (Cat# [RC218344], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-BRCA1(Cat# [TA802628]).
