# Product datasheet for TA803393BM

# CD63 Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI3D9]

## **Product data:**

| Product Type:           | Primary Antibodies   |
|-------------------------|--|
| Clone Name:             | OTI3D9   |
| Applications:           | FC, WB   |
| Recommended Dilution:   | WB 1:2000  |
| Reactivity:             | Human  |
| Host:                   | Mouse  |
| lsotype:                | lgG2b  |
| Clonality:              | Monoclonal   |
| Immunogen:              | Full length human recombinant protein of human CD63 (NP_001771) produced in HEK293T cell.                    |
| Formulation:            | PBS (pH 7.3) containing 1% BSA, 50% glycerol.  |
| Concentration:          | 0.5 mg/ml  |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography<br>(protein A/G) |
| Conjugation:            | HRP  |
| Storage:                | Store at -20°C as received.  |
| Stability:              | Stable for 12 months from date of receipt.   |
| Predicted Protein Size: | 25.5 kDa   |
| Gene Name:              | CD63 molecule  |
| Database Link:          | <u>NP_001771</u><br><u>Entrez Gene 967 Human</u><br><u>P08962</u>  |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### CD63 Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI3D9] – TA803393BM

**Background:** The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. The encoded protein is a cell surface glycoprotein that is known to complex with integrins. It may function as a blood platelet activation marker. Deficiency of this protein is associated with Hermansky-Pudlak syndrome. Also this gene has been associated with tumor progression. Alternative splicing results in multiple transcript variants encoding different protein isoforms. [provided by RefSeq, Apr 2012]

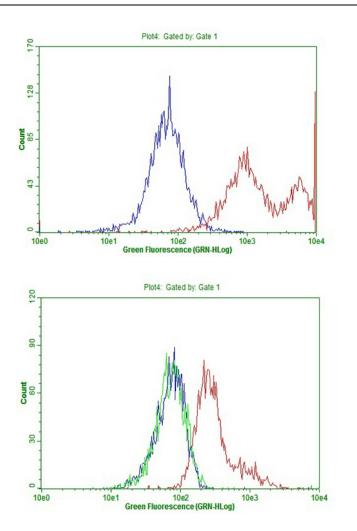

| Synonyms:         | LAMP-3; ME491; MLA1; OMA81H; TSPAN30 |
|-------------------|--------------------------------------|
| Protein Families: | Druggable Genome, Transmembrane      |
| Protein Pathways: | Lysosome                             |

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY CD63 ([RC201733], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-CD63. Positive lysates [LY419757] (100ug) and [LC419757] (20ug) can be purchased separately from OriGene.

HEK293T cells transfected with either [RC201733] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-CD63 antibody ([TA803393]), and then analyzed by flow cytometry (1:100).

Flow cytometric Analysis of MCF-7 cells, using anti-CD63 antibody ([TA803393]), (Red), compared to isotype control, (green), and negative control (PBS), (Blue) (1:100)
