

## Product datasheet for **TA804012AM**

### CD63 Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI3E5]

#### Product data:

|                         |   |
|-------------------------|---|
| Product Type:           | Primary Antibodies  |
| Clone Name:             | OTI3E5  |
| Applications:           | FC  |
| Recommended Dilution:   | FLOW 1:50   |
| Reactivity:             | Human   |
| Host:                   | Mouse   |
| Isotype:                | IgG2a   |
| Clonality:              | Monoclonal  |
| Immunogen:              | Full length human recombinant protein of human CD63 (NP_001771) produced in HEK293T cell.                 |
| Formulation:            | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.                                      |
| Concentration:          | 0.5 mg/ml   |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G) |
| Conjugation:            | Biotin  |
| Storage:                | Store at -20°C as received.   |
| Stability:              | Stable for 12 months from date of receipt.  |
| Predicted Protein Size: | 25.5 kDa  |
| Gene Name:              | CD63 molecule   |
| Database Link:          | <a href="#">NP_001771</a><br><a href="#">Entrez Gene 967 Human</a><br><a href="#">P08962</a>              |

**Background:**

The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. The encoded protein is a cell surface glycoprotein that is known to complex with integrins. It may function as a blood platelet activation marker. Deficiency of this protein is associated with Hermansky-Pudlak syndrome. Also this gene has been associated with tumor progression. Alternative splicing results in multiple transcript variants encoding different protein isoforms. [provided by RefSeq, Apr 2012]

**Synonyms:**

LAMP-3; ME491; MLA1; OMA81H; TSPAN30

**Protein Families:**

Druggable Genome, Transmembrane

**Protein Pathways:**

Lysosome
