Filensin (BFSP1) Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI2C3]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI2C3

Applications: WB

Recommended Dilution: WB 1:2000

Reactivity: Human Host: Mouse

Isotype: lgG1

Clonality: Monoclonal

Immunogen: Human recombinant protein fragment corresponding to amino acids 405-665 of human

BFSP1 (NP_001186) produced in E.coli.

Formulation: PBS (pH 7.3) containing 1% BSA, 50% glycerol.

Concentration: 0.5 mg/ml

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: HRP

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 74.4 kDa

Gene Name: beaded filament structural protein 1

Database Link: NP 001186

Entrez Gene 631 Human

Q12934

Background: This gene encodes a lens-specific intermediate filament-like protein named filensin. The

encoded protein is expressed in lens fiber cells after differentiation has begun. This protein functions as a component of the beaded filament which is a cytoskeletal structure found in lens fiber cells. Mutations in this gene are the cause of autosomal recessive cortical juvenile-onset cataract. Alternate splicing results in multiple transcript variants. [provided by RefSeq,

Jul 2013]

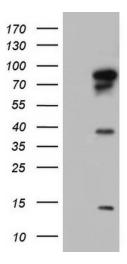

Synonyms:

CP94; CP115; CTRCT33; LIFL-H

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY BFSP1 ([RC213412], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-BFSP1. Positive lysates [LY420073] (100ug) and [LC420073] (20ug) can be purchased separately from OriGene.
