### MRTFA Mouse Monoclonal Antibody [Clone ID: OTI4F6]

#### **Product data:**

**Product Type:** Primary Antibodies

Clone Name: OTI4F6

Applications: WB

Recommended Dilution: WB 1:2000

Reactivity: Human Host: Mouse

Isotype: lgG1

Clonality: Monoclonal

**Immunogen:** Human recombinant protein fragment corresponding to amino acids 165-397 of human

MKL1 (NP\_065882) produced in E.coli.

**Formulation:** PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.

Concentration: 1 mg/ml

**Purification:** Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

**Storage:** Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Gene Name: megakaryoblastic leukemia (translocation) 1

Database Link: NP 065882

Entrez Gene 57591 Human

Q969V6

**Background:** The protein encoded by this gene interacts with the transcription factor myocardin, a key

regulator of smooth muscle cell differentiation. The encoded protein is predominantly nuclear and may help transduce signals from the cytoskeleton to the nucleus. This gene is involved in a specific translocation event that creates a fusion of this gene and the RNA-

binding motif protein-15 gene. This translocation has been associated with acute megakaryocytic leukemia. Alternative splicing results in multiple transcript variants. [provided

by RefSeq, Sep 2013]

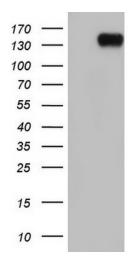

Synonyms: BSAC; MAL; MRTF-A

**Protein Families:** Transcription Factors

# **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY MKL1 ([RC221212], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-MKL1.
