MRTFA Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI2B3]

Product data:

Isotype:

Product Type: Primary Antibodies

Clone Name: OTI2B3

Applications:

Recommended Dilution: WB 1:2000

Reactivity: Human Host: Mouse lgG1

Clonality: Monoclonal

Immunogen: Human recombinant protein fragment corresponding to amino acids 165-397 of human

MKL1 (NP 065882) produced in E.coli.

Formulation: PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.

Concentration: 0.5 mg/ml

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Biotin Conjugation:

Store at -20°C as received. Storage:

Stability: Stable for 12 months from date of receipt. Gene Name: megakaryoblastic leukemia (translocation) 1

Database Link: NP 065882

Entrez Gene 57591 Human

Q969V6

Background: The protein encoded by this gene interacts with the transcription factor myocardin, a key

> regulator of smooth muscle cell differentiation. The encoded protein is predominantly nuclear and may help transduce signals from the cytoskeleton to the nucleus. This gene is involved in a specific translocation event that creates a fusion of this gene and the RNA-

binding motif protein-15 gene. This translocation has been associated with acute megakaryocytic leukemia. Alternative splicing results in multiple transcript variants. [provided

by RefSeq, Sep 2013]

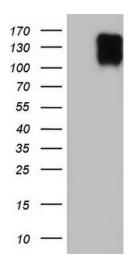

Synonyms: BSAC; MAL; MRTF-A

Protein Families: Transcription Factors

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY MKL1 ([RC221212], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-MKL1.
