Product datasheet for TA805675S

TFPI Mouse Monoclonal Antibody [Clone ID: OTI1E1]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI1E1
Applications:	WB
Recommended Dilution:	WB 1:2000
Reactivity:	Human
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 29-304 of human TFPI (NP_006278) produced in E.coli.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	31.9 kDa
Gene Name:	tissue factor pathway inhibitor
Database Link:	<u>NP_006278</u> <u>Entrez Gene 7035 Human</u> <u>P10646</u>

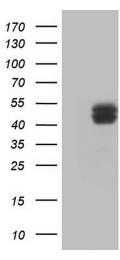

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

GRIGENE TFPI Mouse Monoclonal Antibody [Clone ID: OTI1E1] – TA805675S

Background:This gene encodes a protease inhibitor that regulates the tissue factor (TF)-dependent
pathway of blood coagulation. The coagulation process initiates with the formation of a factor
VIIa-TF complex, which proteolytically activates additional proteases (factors IX and X) and
ultimately leads to the formation of a fibrin clot. The product of this gene inhibits the
activated factor X and VIIa-TF proteases in an autoregulatory loop. The encoded protein is
glycosylated and predominantly found in the vascular endothelium and plasma in both free
forms and complexed with plasma lipoproteins. Several alternatively spliced transcript
variants of this gene have been described, but the full-length nature of some of these
variants has not been confirmed. [provided by RefSeq, Jul 2008]

Synonyms:	EPI; LACI; TFI; TFPI1
Protein Families:	Secreted Protein
Protein Pathways:	Complement and coagulation cascades

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY TFPI ([RC219033], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-TFPI. Positive lysates [LY401895] (100ug) and [LC401895] (20ug) can be purchased separately from OriGene.
