Protein Z (PROZ) Mouse Monoclonal Antibody [Clone ID: OTI3A11]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI3A11

Applications: WB

Recommended Dilution: WB 1:2000

Reactivity: Human Host: Mouse

Host: Mouse Isotype: IgG2a

Clonality: Monoclonal

Immunogen: Human recombinant protein fragment corresponding to amino acids 115-400 of human

PROZ(NP 003882) produced in E.coli.

Formulation: PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.

Concentration: 1 mg/ml

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 40.3 kDa

Gene Name: protein Z, vitamin K dependent plasma glycoprotein

Database Link: NP 003882

Entrez Gene 8858 Human

P22891

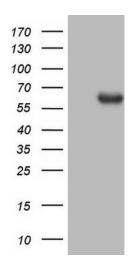

Background:

This gene encodes a liver vitamin K-dependent glycoprotein that is synthesized in the liver and secreted into the plasma. The encoded protein plays a role in regulating blood coagulation by complexing with protein Z-dependent protease inhibitor to directly inhibit activated factor X at the phospholipid surface. Deficiencies in this protein are associated with an increased risk of ischemic arterial diseases and fetal loss. Mutations in this gene are the cause of protein Z deficiency. Alternate splicing results in multiple transcript variants. [provided by RefSeq, Jan

Synonyms: PZ

Protein Families: Druggable Genome, Protease, Secreted Protein

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY PROZ ([RC210379], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-PROZ. Positive lysates [LY401283] (100ug) and [LC401283] (20ug) can be purchased separately from OriGene.
