Product datasheet for TA807104M

Renin (REN) Mouse Monoclonal Antibody [Clone ID: OTI4A3]

Product data:

Product Type:	Primary Antibodies	
Clone Name:	OTI4A3	
Applications:	WB	
Recommended Dilution:	WB 1:500	
Reactivity:	Human	
Host:	Mouse	
lsotype:	lgG1	
Clonality:	Monoclonal	
Immunogen:	Human recombinant protein fragment corresponding to amino acids 131-406 of human REN(NP_000528) produced in E.coli.	
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.	
Concentration:	1 mg/ml	
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)	
Conjugation:	Unconjugated	
Storage:	Store at -20°C as received.	
Stability:	Stable for 12 months from date of receipt.	
Predicted Protein Size:	42.3 kDa	
Gene Name:	renin	
Database Link:	<u>NP_000528</u> <u>Entrez Gene 5972 Human</u> <u>P00797</u>	

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	in (REN) Mouse Monoclonal Antibody [Clone ID: OTI4A3] – TA807104M		
Background:	Renin catalyzes the first step in the activation pathway of angiotensinogena cascade that can result in aldosterone release,vasoconstriction, and increase in blood pressure. Renin, an aspartyl protease, cleaves angiotensinogen to form angiotensin I, which is converted to angiotensin II by angiotensin I converting enzyme, an important regulator of blood pressure and electrolyte balance. Transcript variants that encode different protein isoforms and that arise from alternative splicing and the use of alternative promoters have been described, but their full-length nature has not been determined. Mutations in this gene have been shown to cause familial hyperproreninemia. [provided by RefSeq, Jul 2008]		
Synonyms:	ADTKD4; HNFJ2; RTD		
Protein Families:	Druggable Genome, Secreted Protein		
Protein Pathway	s: Renin-angiotensin system

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY REN ([RC208382], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-REN (1:500). Positive lysates [LY424660] (100ug) and [LC424660] (20ug) can be purchased separately from OriGene.
