

# Product datasheet for TA807139S

## GFI1 Mouse Monoclonal Antibody [Clone ID: OTI6C10]

### **Product data:**

Product Type:	Primary Antibodies		
Clone Name:	OTI6C10		
Applications:	WB		
Recommended Dilution:	WB 1:2000		
Reactivity:	Human, Mouse, Rat		
Host:	Mouse		
lsotype:	lgG1		
Clonality:	Monoclonal		
Immunogen:	Full length human recombinant protein of human GFI1 (NP_005254) produced in E.coli.		
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.		
Concentration:	1 mg/ml		
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)		
Conjugation:	Unconjugated		
Storage:	Store at -20°C as received.		
Stability:	Stable for 12 months from date of receipt.		
Predicted Protein Size:	45.1 kDa		
Gene Name:	growth factor independent 1 transcriptional repressor		
Database Link:	<u>NP_005254</u> <u>Entrez Gene 14581 MouseEntrez Gene 24388 RatEntrez Gene 2672 Human</u> <u>Q99684</u>

	GFI1 Mouse Monoclonal Antibody [Clone ID: OTI6C10] – TA807139S		
Background:	This gene encodes a nuclear zinc finger protein that functions as a transcriptional repressor. This protein plays a role in diverse developmental contexts, including hematopoiesis and oncogenesis. It functions as part of a complex along with other cofactors to control histone modifications that lead to silencing of the target gene promoters. Mutations in this gene cause autosomal dominant severe congenital neutropenia, and also dominant nonimmune chronic idiopathic neutropenia of adults, which are heterogeneous hematopoietic disorders that cause predispositions to leukemias and infections. Multiple alternatively spliced variants, encoding the same protein, have been identified for this gene. [provided by RefSeq, Jul 2008]		
Synonyms:	GFI-1; GFI1A; SCN2; ZNF163		
<b>Protein Families</b>	: Druggable Genome, Transcription Factors

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY GFI1 ([RC207574], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-GFI1. Positive lysates [LY417416] (100ug) and [LC417416] (20ug) can be purchased separately from OriGene.
