Product datasheet for TA807198

CD3E Mouse Monoclonal Antibody [Clone ID: UCHT1]

Product data:

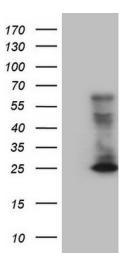

| Product Type: | Primary Antibodies |
|-------------------------|--|
| Clone Name: | UCHT1 |
| Applications: | FC, WB |
| Recommended Dilution: | WB 1:2000, FLOW 1:100 |
| Reactivity: | Human |
| Host: | Mouse |
| lsotype: | lgG1 |
| Clonality: | Monoclonal |
| Immunogen: | Human infant thymocytes and lymphocytes from a patient with Sézary disease |
| Formulation: | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide. |
| Concentration: | 1 mg/ml |
| Purification: | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G) |
| Conjugation: | Unconjugated |
| Storage: | Store at -20°C as received. |
| Stability: | Stable for 12 months from date of receipt. |
| Predicted Protein Size: | 20.7 kDa |
| Gene Name: | CD3e molecule |
| Database Link: | <u>NP_000724</u> <u>Entrez Gene 916 Human</u> <u>P07766</u> |

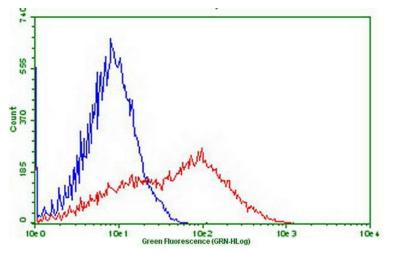

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

| | CD3E Mouse Monoclonal Antibody [Clone ID: UCHT1] – TA807198 |
|-------------------|---|
| Background: | The protein encoded by this gene is the CD3-epsilon polypeptide, which together with CD3- gamma, -delta and -zeta, and the T-cell receptor alpha/beta and gamma/delta heterodimers, forms the T-cell receptor-CD3 complex. This complex plays an important role in coupling antigen recognition to several intracellular signal-transduction pathways. The genes encoding the epsilon, gamma and delta polypeptides are located in the same cluster on chromosome 11. The epsilon polypeptide plays an essential role in T-cell development. Defects in this gene cause immunodeficiency. This gene has also been linked to a susceptibility to type I diabetes in women. [provided by RefSeq, Jul 2008] |
| Synonyms: | IMD18; T3E; TCRE |
| Protein Families: | Druggable Genome, Transmembrane |
| Protein Pathway | s: Hematopoietic cell lineage, Primary immunodeficiency, T cell receptor signaling pathway |

Product images:

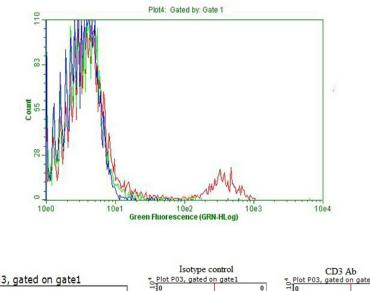

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY CD3 ([RC208276], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-CD3 (1:2000). Positive lysates [LY400242] (100ug) and [LC400242] (20ug) can be purchased separately from OriGene.

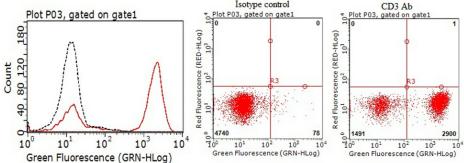

Flow cytometric Analysis of live Jurkat cells, using anti-CD3 antibody (TA807198), (Red), compared to a nonspecific negative control antibody (Mouse-IGg), (Blue) (1:100).
