

# Product datasheet for TA807383M

## PON3 Mouse Monoclonal Antibody [Clone ID: OTI1B12]

### **Product data:**

| Product Type:           | Primary Antibodies  |  |
|-------------------------|---|--|
| Clone Name:             | OTI1B12   |  |
| Applications:           | IHC, WB   |  |
| Recommended Dilution:   | WB 1:2000, IHC 1:150  |  |
| Reactivity:             | Human   |  |
| Host:                   | Mouse   |  |
| lsotype:                | lgG1  |  |
| Clonality:              | Monoclonal  |  |
| Immunogen:              | Human recombinant protein fragment corresponding to amino acids 30-319 of human PON3(NP_000931) produced in E.coli. |  |
| Formulation:            | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.  |  |
| Concentration:          | 1 mg/ml   |  |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography<br>(protein A/G)        |  |
| Conjugation:            | Unconjugated  |  |
| Storage:                | Store at -20°C as received.   |  |
| Stability:              | Stable for 12 months from date of receipt.  |  |
| Predicted Protein Size: | 39.4 kDa  |  |
| Gene Name:              | paraoxonase 3   |  |
| Database Link:          | <u>NP_000931</u><br><u>Entrez Gene 5446 Human</u><br><u>Q15166</u>  |  |

|                  | PON3 Mouse Monoclonal Antibody [Clone ID: OTI1B12] – TA807383M   |  |
|------------------|--|--|
| Background:      | This gene is a member of the paraoxonase family and lies in a cluster on chromosome 7 with<br>the other two family members. The encoded protein is secreted into the bloodstream and<br>associates with high-density lipoprotein (HDL). The protein also rapidly hydrolyzes lactones<br>and can inhibit the oxidation of low-density lipoprotein (LDL), a function that is believed to<br>slow the initiation and progression of atherosclerosis. Alternatively spliced variants which<br>encode different protein isoforms have been described; however, only one has been fully<br>characterized. [provided by RefSeq, Jul 2008] |  |
| Synonyms:        | lactonase 3; paraoxanase-3; paraoxonase 3; serum paraoxonase   |  |
| Protein Families | : Secreted Protein, Transmembrane  |  |
| Protein Pathway  | vs: Metabolic pathways   |  |

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY PON3 ([RC210019], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-PON3 (1:2000). Positive lysates [LY400339] (100ug) and [LC400339] (20ug) can be purchased separately from OriGene.

Immunohistochemical staining of paraffinembedded Human liver tissue within the normal limits using anti-PON3 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Immunohistochemical staining of paraffinembedded Human lymphoma tissue using anti-PON3 mouse monoclonal antibody. This figure shows negative staining. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.
