

Product datasheet for TA807571M

CD40 Mouse Monoclonal Antibody [Clone ID: OTI7H2]

Product data:

Product Type: Primary Antibodies Clone Name: OTI7H2 **Applications:** WB Recommended Dilution: WB 1:200~2000 **Reactivity:** Human Host: Mouse Isotype: lgG1 **Clonality:** Monoclonal Immunogen: Human recombinant protein fragment corresponding to amino acids 21-166 of human CD40(NP 001241) produced in E.coli. Formulation: PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide. **Concentration:** 1 mg/ml **Purification:** Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G) **Conjugation:** Unconjugated Store at -20°C as received. Storage: Stability: Stable for 12 months from date of receipt. Gene Name: CD40 molecule Database Link: NP 001241 Entrez Gene 958 Human P25942

	CD40 Mouse Monoclonal Antibody [Clone ID: OTI7H2] – TA807571M	
Background:	The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor has been found to be essential in mediating a broad variety of immune and inflammatory responses including T cell-dependent immunoglobulin class switching, memory B cell development, and germinal center formation. AT-hook transcription factor AKNA is reported to coordinately regulate the expression of this receptor and its ligand, which may be important for homotypic cell interactions. Adaptor protein TNFR2 interacts with this receptor and serves as a mediator of the signal transduction. The interaction of this receptor and its ligand is found to be necessary for amyloid-beta-induced microglial activation, and thus is thought to be an early event in Alzheimer disease pathogenesis. Two alternatively spliced transcript variants of this gene encoding distinct isoforms have been reported. [provided by RefSeq, Jul	
Synonyms:	Bp50; CDW40; p50; TNFRSF5	
Protein Families:	Druggable Genome, Secreted Protein, Transmembrane	
Protein Pathway	y s: Allograft rejection, Asthma, Autoimmune thyroid disease, Cell adhesion molecules (CAMs), Cytokine-cytokine receptor interaction, Primary immunodeficiency, Systemic lupus	

erythematosus, Toll-like receptor signaling pathway, Viral myocarditis

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY CD40 ([RC201977], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-CD40. Positive lysates [LY400500] (100ug) and [LC400500] (20ug) can be purchased separately from OriGene.
