# Product datasheet for TA807715

# CTLA4 Mouse Monoclonal Antibody [Clone ID: OTI1E2]

#### **Product data:**

| Product Type:           | Primary Antibodies   |
|-------------------------|--|
| Clone Name:             | OTI1E2   |
| Applications:           | IF, WB   |
| Recommended Dilution:   | WB 1:2000  |
| Reactivity:             | Human  |
| Host:                   | Mouse  |
| lsotype:                | lgG1   |
| Clonality:              | Monoclonal   |
| Immunogen:              | Full length human recombinant protein of human CTLA4 (NP_001032720) produced in<br>HEK293T cell.             |
| Formulation:            | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.   |
| Concentration:          | 1 mg/ml  |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography<br>(protein A/G) |
| Conjugation:            | Unconjugated   |
| Storage:                | Store at -20°C as received.  |
| Stability:              | Stable for 12 months from date of receipt.   |
| Predicted Protein Size: | 15 kDa   |
| Gene Name:              | cytotoxic T-lymphocyte associated protein 4  |
| Database Link:          | <u>NP_001032720</u><br><u>Entrez Gene 1493 Human</u><br><u>P16410</u>  |

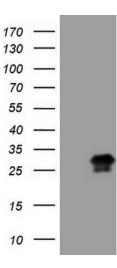

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

# STLA4 Mouse Monoclonal Antibody [Clone ID: OTI1E2] – TA807715

| Background:       | This gene is a member of the immunoglobulin superfamily and encodes a protein which transmits an inhibitory signal to T cells. The protein contains a V domain, a transmembrane domain, and a cytoplasmic tail. Alternate transcriptional splice variants, encoding different isoforms, have been characterized. The membrane-bound isoform functions as a homodimer interconnected by a disulfide bond, while the soluble isoform functions as a monomer. Mutations in this gene have been associated with insulin-dependent diabetes mellitus, Graves disease, Hashimoto thyroiditis, celiac disease, systemic lupus erythematosus, thyroid-associated orbitopathy, and other autoimmune diseases. [provided by RefSeq, Jul 2008] |
|-------------------|---|
| Synonyms:         | ALPS5; CD; CD152; CELIAC3; CTLA-4; GRD4; GSE; IDDM12  |
| Protein Families: | Druggable Genome, Transmembrane   |
| Protein Pathways: | Autoimmune thyroid disease, Cell adhesion molecules (CAMs), T cell receptor signaling pathway   |

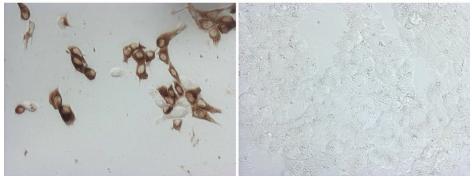

## **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY CTLA4 ([RC213631], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-CTLA4 (1:2000). Positive lysates [LY421970] (100ug) and [LC421970] (20ug) can be purchased separately from OriGene.

CTLA4-14

293T

Immunocytochemistry staining of CTLA4-14 cells using anti-CTLA4 mouse monoclonal antibody (TA807715) (Left). The right is negative control (1:1000).
