Product datasheet for TA807814M

PCDHGC5 Mouse Monoclonal Antibody [Clone ID: OTI1D7]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI1D7
Applications:	WB
Recommended Dilution:	WB 1:2000
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 35-258 of human PCDHGC5(NP_115783) produced in E.coli.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	92 kDa
Gene Name:	protocadherin gamma subfamily C, 5
Database Link:	<u>NP_115783</u> <u>Entrez Gene 56097 Human</u> <u>Q9Y5F6</u>

CRIGENE PCDHGC5 Mouse Monoclonal Antibody [Clone ID: OTI1D7] – TA807814M

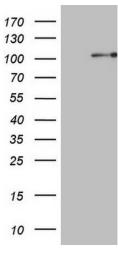

Background:This gene is a member of the protocadherin gamma gene cluster, one of three related
clusters tandemly linked on chromosome five. These gene clusters have an immunoglobulin-
like organization, suggesting that a novel mechanism may be involved in their regulation and
expression. The gamma gene cluster includes 22 genes divided into 3 subfamilies. Subfamily
A contains 12 genes, subfamily B contains 7 genes and 2 pseudogenes, and the more
distantly related subfamily C contains 3 genes. The tandem array of 22 large, variable region
exons are followed by a constant region, containing 3 exons shared by all genes in the cluster.
Each variable region exon encodes the extracellular region, which includes 6 cadherin
ectodomains and a transmembrane region. The constant region exons encode the common
cytoplasmic region. These neural cadherin-like cell adhesion proteins most likely play a critical
role in the establishment and function of specific cell-cell connections in the brain.
Alternative splicing has been described for the gamma cluster genes. [provided by RefSeq, Jul

Synonyms: PCDH-GAMMA-C5

Protein Families:

nilies: Transmembrane

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY PCDHGC5 ([RC211316], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-PCDHGC5 (1:2000). Positive lysates [LY410148] (100ug) and [LC410148] (20ug) can be purchased separately from OriGene.
