# Product datasheet for TA808384AM

## Cytokeratin 16 (KRT16) Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI2F10]

#### **Product data:**

Product Type:	Primary Antibodies
Clone Name:	OTI2F10
Applications:	WB
Recommended Dilution:	WB 1:2000
Reactivity:	Human, Rat
Host:	Mouse
lsotype:	lgG2a
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human KRT16 (NP_005548) produced in E.coli.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	0.5 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Biotin
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	51.1 kDa
Gene Name:	keratin 16
Database Link:	<u>NP_005548</u> <u>Entrez Gene 303530 RatEntrez Gene 3868 Human</u> <u>P08779</u>

# Cytokeratin 16 (KRT16) Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI2F10] TA808384AM Background: The protein encoded by this gene is a member of the keratin gene family. The keratins are intermediate filament proteins responsible for the structural integrity of epithelial cells and

intermediate filament proteins responsible for the structural integrity of epithelial cells and are subdivided into cytokeratins and hair keratins. Most of the type I cytokeratins consist of acidic proteins which are arranged in pairs of heterotypic keratin chains and are clustered in a region of chromosome 17q12-q21. This keratin has been coexpressed with keratin 14 in a number of epithelial tissues, including esophagus, tongue, and hair follicles. Mutations in this gene are associated with type 1 pachyonychia congenita, non-epidermolytic palmoplantar keratoderma and unilateral palmoplantar verrucous nevus. [provided by RefSeq, Jul 2008]

#### Synonyms: CK16; FNEPPK; K1CP; K16; KRT16A; NEPPK; PC1

### **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY KRT16 ([RC204470], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-KRT16 (1:2000). Positive lysates [LY417219] (100ug) and [LC417219] (20ug) can be purchased separately from OriGene.
