# Product datasheet for TA808641BM

# MRPS15 Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI5F5]

## **Product data:**

Product Type:	Primary Antibodies
Clone Name:	OTI5F5
Applications:	WB
Recommended Dilution:	WB 1:2000
Reactivity:	Human
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human MRPS15(NP_112570) produced in E.coli.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol.
Concentration:	0.5 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	HRP
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	29.7 kDa
Gene Name:	mitochondrial ribosomal protein S15
Database Link:	<u>NP_112570</u> <u>Entrez Gene 64960 Human</u> <u>P82914</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

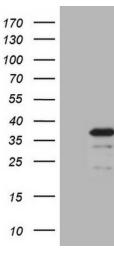

#### CRIGENE MRPS15 Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI5F5] – TA808641BM

Background:Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in<br/>protein synthesis within the mitochondrion. Mitochondrial ribosomes (mitoribosomes)<br/>consist of a small 28S subunit and a large 39S subunit. They have an estimated 75% protein<br/>to rRNA composition compared to prokaryotic ribosomes, where this ratio is reversed.<br/>Another difference between mammalian mitoribosomes and prokaryotic ribosomes is that<br/>the latter contain a 5S rRNA. Among different species, the proteins comprising the<br/>mitoribosome differ greatly in sequence, and sometimes in biochemical properties, which<br/>prevents easy recognition by sequence homology. This gene encodes a 28S subunit protein<br/>that belongs to the ribosomal protein S15P family. The encoded protein is more than two<br/>times the size of its E. coli counterpart, with the 12S rRNA binding sites conserved. Between<br/>human and mouse, the encoded protein is the least conserved among small subunit<br/>ribosomal proteins. Pseudogenes corresponding to this gene are found on chromosomes 15q<br/>and 19q. [provided by RefSeq, Jul 2008]

Synonyms:

DC37; MPR-S15; RPMS15; S15mt

### **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY MRPS15 (Cat# [RC207694], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-MRPS15 (Cat# [TA808641])(1:2000). Positive lysates [LY410616] (100ug) and [LC410616] (20ug) can be purchased separately from OriGene.
