Vitamin D Binding protein (GC) Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI8C5]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI8C5

Applications: WB

Recommended Dilution: WB 1:2000

Reactivity: Human Host: Mouse

Isotype: IgG1

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human GC (NP_000574) produced in HEK293T cell.

Formulation: PBS (pH 7.3) containing 1% BSA, 50% glycerol.

Concentration: 0.5 mg/ml

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: HRP

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 51.1 kDa

Gene Name: GC, vitamin D binding protein

Database Link: NP 000574

Entrez Gene 2638 Human

P02774

Background: The protein encoded by this gene belongs to the albumin gene family. It is a multifunctional

protein found in plasma, ascitic fluid, cerebrospinal fluid and on the surface of many cell types. It binds to vitamin D and its plasma metabolites and transports them to target tissues. Alternatively spliced transcript variants encoding different isoforms have been found for this

gene. [provided by RefSeq, Feb 2011]

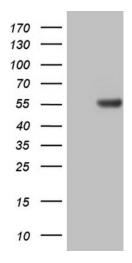

Synonyms: DBP; GC; Gc-MAF; GcMAF; GRD3; HEL-S-51; VDBG; VDBP

Protein Families: Secreted Protein

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY GC ([RC208864], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-GC (1:2000). Positive lysates [LY400197] (100ug) and [LC400197] (20ug) can be purchased separately from OriGene.
