

Product datasheet for **TA809592AM**

ROR gamma (RORC) Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI1G3]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI1G3
Applications:	WB
Recommended Dilution:	WB 1:2000
Reactivity:	Human, Mouse, Rat
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 1-266 of human RORC (NP_005051) produced in E.coli.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	0.5 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Biotin
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Gene Name:	RAR related orphan receptor C
Database Link:	NP_005051 Entrez Gene 19885 Mouse Entrez Gene 368158 Rat Entrez Gene 6097 Human P51449
Background:	The protein encoded by this gene is a DNA-binding transcription factor and is a member of the NR1 subfamily of nuclear hormone receptors. The specific functions of this protein are not known; however, studies of a similar gene in mice have shown that this gene may be essential for lymphoid organogenesis and may play an important regulatory role in thymopoiesis. In addition, studies in mice suggest that the protein encoded by this gene may inhibit the expression of Fas ligand and IL2. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul 2008]

Synonyms: NR1F3; RORG; RZR-GAMMA; RZRG; TOR

Protein Families: Druggable Genome, Transcription Factors

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY RORC ([RC206541], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-RORC (1:2000). Positive lysates [LY401568] (100ug) and [LC401568] (20ug) can be purchased separately from OriGene.
