# Product datasheet for TA812258

## IL2 Receptor beta (IL2RB) Mouse Monoclonal Antibody [Clone ID: OTI1D12]

#### **Product data:**

| Product Type:           | Primary Antibodies  |  |
|-------------------------|---|--|
| Clone Name:             | OTI1D12   |  |
| Applications:           | WB  |  |
| Recommended Dilution:   | WB 1:500  |  |
| Reactivity:             | Human   |  |
| Host:                   | Mouse   |  |
| lsotype:                | lgG1  |  |
| Clonality:              | Monoclonal  |  |
| Immunogen:              | Human recombinant protein fragment corresponding to amino acids 27-240+Mouse FC of<br>human IL2RB (NP_000869) produced in HEK293T cell. |  |
| Formulation:            | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.  |  |
| Concentration:          | 1 mg/ml   |  |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography<br>(protein A/G)                            |  |
| Conjugation:            | Unconjugated  |  |
| Storage:                | Store at -20°C as received.   |  |
| Stability:              | Stable for 12 months from date of receipt.  |  |
| Predicted Protein Size: | 61.12 kDa   |  |
| Gene Name:              | interleukin 2 receptor subunit beta   |  |
| Database Link:          | <u>NP_000869</u><br><u>Entrez Gene 3560 Human</u><br><u>P14784</u>  |  |

|                 | IL2 Receptor beta (IL2RB) Mouse Monoclonal Antibody [Clone ID: OTI1D12] – TA812258  |  |
|-----------------|---|--|
| Background:     | The interleukin 2 receptor, which is involved in T cell-mediated immune responses, is present<br>in 3 forms with respect to ability to bind interleukin 2. The low affinity form is a monomer of<br>the alpha subunit and is not involved in signal transduction. The intermediate affinity form<br>consists of an alpha/beta subunit heterodimer, while the high affinity form consists of an<br>alpha/beta/gamma subunit heterotrimer. Both the intermediate and high affinity forms of the<br>receptor are involved in receptor-mediated endocytosis and transduction of mitogenic<br>signals from interleukin 2. The protein encoded by this gene represents the beta subunit and<br>is a type I membrane protein. [provided by RefSeq, Jul 2008] |  |
| Synonyms:       | CD122; IL15RB; P70-75   |  |
| Protein Familie | s: Druggable Genome, Transmembrane  |  |
| Protein Pathwa  | Cytokine-cytokine receptor interaction, Endocytosis, Jak-STAT signaling pathway   |  |

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY IL2RB ([RC206591], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-IL2RB. Positive lysates [LY400313] (100ug) and [LC400313] (20ug) can be purchased separately from OriGene.
