	beta Arrestin 1 (ARRB1) Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI2B3] – TA812546BM
Background:	Members of arrestin/beta-arrestin protein family are thought to participate in agonist- mediated desensitization of G-protein-coupled receptors and cause specific dampening of cellular responses to stimuli such as hormones, neurotransmitters, or sensory signals. Arrestin beta 1 is a cytosolic protein and acts as a cofactor in the beta-adrenergic receptor kinase (BARK) mediated desensitization of beta-adrenergic receptors. Besides the central nervous system, it is expressed at high levels in peripheral blood leukocytes, and thus the BARK/beta-arrestin system is believed to play a major role in regulating receptor-mediated immune functions. Alternatively spliced transcripts encoding different isoforms of arrestin

beta 1 have been described. [provided by RefSeq, Jan 2011].

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY ARRB1 ([RC201279], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-ARRB1.(1:2000)

Western blot analysis of extracts (35ug) from 3 cell lines lysates by using anti-ARRB1 monoclonal antibody. (1:500)
