Product datasheet for TA812680AM

DUSP1 Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI4F10]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI4F10
Applications:	WB
Recommended Dilution:	WB 1:500
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human DUSP1 (NP_004408) produced in E.coli.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	0.5 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Biotin
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	39.1 kDa
Gene Name:	dual specificity phosphatase 1
Database Link:	<u>NP_004408</u> <u>Entrez Gene 19252 MouseEntrez Gene 114856 RatEntrez Gene 1843 Human</u> <u>P28562</u>

	DUSP1 Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI4F10] – TA812680AM
Background:	The expression of DUSP1 gene is induced in human skin fibroblasts by oxidative/heat stress and growth factors. It specifies a protein with structural features similar to members of the non-receptor-type protein-tyrosine phosphatase family, and which has significant amino-acid sequence similarity to a Tyr/Ser-protein phosphatase encoded by the late gene H1 of vaccinia virus. The bacterially expressed and purified DUSP1 protein has intrinsic phosphatase activity, and specifically inactivates mitogen-activated protein (MAP) kinase in vitro by the concomitant dephosphorylation of both its phosphothreonine and phosphotyrosine residues. Furthermore, it suppresses the activation of MAP kinase by oncogenic ras in extracts of Xenopus oocytes. Thus, DUSP1 may play an important role in the human cellular response to environmental stress as well as in the negative regulation of cellular proliferation. [provided by RefSeq, Jul 2008]
Synonyms:	CL100; HVH1; MKP-1; MKP1; PTPN10
Protein Families	: Druggable Genome, Phosphatase

Protein Pathways:MAPK signaling pathway

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY DUSP1 (Cat# [RC205220], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-DUSP1 (Cat# [TA812680])(1:500). Positive lysates [LY401403] (100ug) and [LC401403] (20ug) can be purchased separately from OriGene.
