# Product datasheet for TA812775M

## Xanthine Oxidase (XDH) Mouse Monoclonal Antibody [Clone ID: OTI5D8]

#### **Product data:**

| Product Type:           | Primary Antibodies  |  |
|-------------------------|---|--|
| Clone Name:             | OTI5D8  |  |
| Applications:           | WB  |  |
| Recommended Dilution:   | WB 1:500  |  |
| Reactivity:             | Human, Mouse, Rat   |  |
| Host:                   | Mouse   |  |
| lsotype:                | lgG1  |  |
| Clonality:              | Monoclonal  |  |
| Immunogen:              | Human recombinant protein fragment corresponding to amino acids 1-280 of human XDH<br>(NP_000370) produced in E.coli. |  |
| Formulation:            | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.  |  |
| Concentration:          | 1 mg/ml   |  |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography<br>(protein A/G)          |  |
| Conjugation:            | Unconjugated  |  |
| Storage:                | Store at -20°C as received.   |  |
| Stability:              | Stable for 12 months from date of receipt.  |  |
| Predicted Protein Size: | 146.2 kDa   |  |
| Gene Name:              | xanthine dehydrogenase  |  |
| Database Link:          | <u>NP_000370</u><br><u>Entrez Gene 22436 MouseEntrez Gene 497811 RatEntrez Gene 7498 Human</u><br><u>P47989</u>       |  |

|                   | Xanthine Oxidase (XDH) Mouse Monoclonal Antibody [Clone ID: OTI5D8] – TA812775M   |  |
|-------------------|---|--|
| Background:       | Xanthine dehydrogenase belongs to the group of molybdenum-containing hydroxylases<br>involved in the oxidative metabolism of purines. The encoded protein has been identified as<br>a moonlighting protein based on its ability to perform mechanistically distinct functions.<br>Xanthine dehydrogenase can be converted to xanthine oxidase by reversible sulfhydryl<br>oxidation or by irreversible proteolytic modification. Defects in xanthine dehydrogenase<br>cause xanthinuria, may contribute to adult respiratory stress syndrome, and may potentiate<br>influenza infection through an oxygen metabolite-dependent mechanism. [provided by<br>RefSeq, Jan 2014] |  |
| Synonyms:         | XAN1; XO; XOR   |  |
| Protein Families: | Druggable Genome  |  |
| Protein Pathway   | Pathways: Caffeine metabolism, Drug metabolism - other enzymes, Metabolic pathways, Purine metabolism   |  |

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY XDH ([RC219402], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-XDH (1:500). Positive lysates [LY400135] (100ug) and [LC400135] (20ug) can be purchased separately from OriGene.
