|                         | FOXP1 Mouse Monoclonal Antibody [Clone ID: OTI2H3] – TA813710S  |
|-------------------------|---|
| Background:             | This gene belongs to subfamily P of the forkhead box (FOX) transcription factor family.<br>Forkhead box transcription factors play important roles in the regulation of tissue- and cell<br>type-specific gene transcription during both development and adulthood. Forkhead box P1<br>protein contains both DNA-binding- and protein-protein binding-domains. This gene may act<br>as a tumor suppressor as it is lost in several tumor types and maps to a chromosomal region<br>(3p14.1) reported to contain a tumor suppressor gene(s). Alternative splicing results in<br>multiple transcript variants encoding different isoforms. [provided by RefSeq, Jul 2008] |
