

Product datasheet for **TA814168M**

Mesothelin (MSLN) Mouse Monoclonal Antibody [Clone ID: OTI7C2]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI7C2
Applications:	IHC
Recommended Dilution:	IHC 1:1500
Reactivity:	Human
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human MSLN (NP_037536) produced in HEK293T cell.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Shipped at -20°C or with ice packs, Upon delivery store at -20°C. Dilute in PBS(pH7.3) if necessary. Stable for 12 months from date of receipt. Avoid repeated freeze-thaws.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	68.99 kDa
Gene Name:	mesothelin
Database Link:	NP_037536 Entrez Gene 10232 Human Q13421

Background:

This gene encodes a preproprotein that is proteolytically processed to generate two protein products, megakaryocyte potentiating factor and mesothelin. Megakaryocyte potentiating factor functions as a cytokine that can stimulate colony formation of bone marrow megakaryocytes. Mesothelin is a glycosylphosphatidylinositol-anchored cell-surface protein that may function as a cell adhesion protein. This protein is overexpressed in epithelial mesotheliomas, ovarian cancers and in specific squamous cell carcinomas. Alternative splicing results in multiple transcript variants, at least one of which encodes an isoform that is proteolytically processed. [provided by RefSeq, Feb 2016]

Synonyms:

MPF; SMRP

Protein Families:

Druggable Genome, Secreted Protein, Transmembrane

Product images:

Immunohistochemical staining of paraffin-embedded Carcinoma of Human prostate tissue using anti-MSLN mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffin-embedded Human tonsil within the normal limits using anti-MSLN mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.
