Product datasheet for TA814443

NGAL (LCN2) Mouse Monoclonal Antibody [Clone ID: OTI1D5]

Product data:

| Product Type: | Primary Antibodies |
|-------------------------|---|
| Clone Name: | OTI1D5 |
| Applications: | ELISA |
| Recommended Dilution: | ELISA 1:5000-10000 |
| Reactivity: | Human |
| Host: | Mouse |
| lsotype: | lgG2b |
| Clonality: | Monoclonal |
| Immunogen: | Human recombinant protein fragment corresponding to amino acids 21-198 of human NGAL (NP_005555) produced in E.coli. |
| Formulation: | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide. |
| Concentration: | 1 mg/ml |
| Purification: | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G) |
| Conjugation: | Unconjugated |
| Predicted Protein Size: | 22.6 kDa |
| Gene Name: | lipocalin 2 |
| Database Link: | <u>NP_005555</u> <u>Entrez Gene 3934 Human</u> <u>P80188</u> |

| | NGAL (LCN2) Mouse Monoclonal Antibody [Clone ID: OTI1D5] – TA814443 |
|------------------|--|
| Background: | This gene encodes a protein that belongs to the lipocalin family. Members of this family transport small hydrophobic molecules such as lipids, steroid hormones and retinoids. The protein encoded by this gene is a neutrophil gelatinase-associated lipocalin and plays a role in innate immunity by limiting bacterial growth as a result of sequestering iron-containing siderophores. The presence of this protein in blood and urine is an early biomarker of acute kidney injury. This protein is thought to be be involved in multiple cellular processes, including maintenance of skin homeostasis, and suppression of invasiveness and metastasis. Mice lacking this gene are more susceptible to bacterial infection than wild type mice. [provided by RefSeq, Sep 2015] |
| Synonyms: | 24p3; MSFI; NGAL; p25 |
| Protein Families | : Secreted Protein |
