## FANCL Rabbit Polyclonal Antibody

### **Product data:**

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	WB: 1:500
Reactivity:	Human
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Recombinant protein of human FANCL
Formulation:	PBS with 0.02% sodium azide, 50% glycerol, pH7.3
Concentration:	1.03mg/ml
Purification:	Purified from the immunized serum by affinity chromatography (Protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	43.2 kDa
Gene Name:	Fanconi anemia complementation group L
Database Link:	<u>NP 001108108</u>
	Entrez Gene 55120 Human
	<u>Q9NW38</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### **GRIGENE** FANCL Rabbit Polyclonal Antibody – TA890015

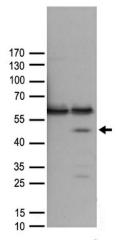

Background:The Fanconi anemia complementation group (FANC) currently includes FANCA, FANCB,<br/>FANCC, FANCD1 (also called BRCA2), FANCD2, FANCE, FANCF, FANCG, FANCI, FANCJ (also<br/>called BRIP1), FANCL, FANCM and FANCN (also called PALB2). The previously defined group<br/>FANCH is the same as FANCA. Fanconi anemia is a genetically heterogeneous recessive<br/>disorder characterized by cytogenetic instability, hypersensitivity to DNA crosslinking agents,<br/>increased chromosomal breakage, and defective DNA repair. The members of the Fanconi<br/>anemia complementation group do not share sequence similarity; they are related by their<br/>assembly into a common nuclear protein complex. This gene encodes the protein for<br/>complementation group L. Alternative splicing results in two transcript variants encoding<br/>different isoforms. [provided by RefSeq, Jul 2008]

Synonyms: FAAP43; PHF9; POG

Protein Pathways:

Ubiquitin mediated proteolysis

#### **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY FANCL (Cat# [RC208718], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-FANCL antibody (Cat# TA890015). Positive lysates [LY426502] (100ug) and [LC426502] (20ug) can be purchased separately from OriGene.
