## PKC delta (PRKCD) Rabbit Polyclonal Antibody (HRP conjugated)

## Product data:

Product Type: Primary Antibodies
Applications: WB
Recommended Dilution: WB: 1:500~1:1000
Reactivity:
Host:
Rabbit
Isotype:
Clonality:
Immunogen:
Formulation:
Concentration:
Purification:
Conjugation:
Storage:
Stability:
Predicted Protein Size:
Gene Name:
Database Link:

IgG
Polyclonal
Recombinant protein of human PRKCD
PBS (pH 7.4) containing 1\% BSA, 50\% glycerol.
$0.5 \mathrm{mg} / \mathrm{ml}$
Purified from the immunized serum by affinity chromatography (Protein A/G)
HRP
Store at $-20^{\circ} \mathrm{C}$ as received.
Stable for 12 months from date of receipt.
77.3 kDa
protein kinase C delta
NP 997704
Entrez Gene 18753 MouseEntrez Gene 170538 RatEntrez Gene 5580 Human Q05655

Protein Pathways:

## Product images:

Protein kinase $C(P K C)$ is a family of serine- and threonine-specific protein kinases that can be activated by calcium and the second messenger diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pathways. PKC family members also serve as major receptors for phorbol esters, a class of tumor promoters. Each member of the PKC family has a specific expression profile and is believed to play distinct roles in cells. The protein encoded by this gene is one of the PKC family members. Studies both in human and mice demonstrate that this kinase is involved in B cell signaling and in the regulation of growth, apoptosis, and differentiation of a variety of cell types. Alternatively spliced transcript variants encoding the same protein have been observed. [provided by RefSeq, Jul 2008]

ALPS3; CVID9; MAY1; nPKC-delta; PKCD
Druggable Genome, Protein Kinase
Chemokine signaling pathway, Fc epsilon RI signaling pathway, Fc gamma R-mediated phagocytosis, GnRH signaling pathway, Neurotrophin signaling pathway, Tight junction, Type II diabetes mellitus, Vascular smooth muscle contraction

HEK293T cells were transfected with the pCMV6ENTRY control (Cat\# [PS100001], Left lane) or pCMV6-ENTRY PRKCD (Cat\# [RC208127], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates ( 5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-PRKCD antibody (Cat\# [TA890030]). Positive lysates [LY403724] (100ug) and [LC403724] (20ug) can be purchased separately from OriGene.

> Western blot analysis of extracts ( 35 ug ) from different cell lines or tissues by using anti-PRKCD rabbit polyclonal antibody ([TA890030]).
