

Product datasheet for TA890142M

SHP2 (PTPN11) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: WB

Recommended Dilution: WB: 1:500~2000

Reactivity: Human, Rat, Mouse

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Recombinant protein of human PTPN11

Formulation: PBS with 0.02% sodium azide, 50% glycerol, pH7.3

Concentration: 2.23 mg/ml

Purification: Purified from the immunized serum by affinity chromatography (Protein A/G)

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 67.8 kDa

Gene Name: protein tyrosine phosphatase, non-receptor type 11

Database Link: NP 002825

Q06124

Background: The protein encoded by this gene is a member of the protein tyrosine phosphatase (PTP)

family. PTPs are known to be signaling molecules that regulate a variety of cellular processes including cell growth, differentiation, mitotic cycle, and oncogenic transformation. This PTP contains two tandem Src homology-2 domains, which function as phospho-tyrosine binding domains and mediate the interaction of this PTP with its substrates. This PTP is widely expressed in most tissues and plays a regulatory role in various cell signaling events that are important for a diversity of cell functions, such as mitogenic activation, metabolic control, transcription regulation, and cell migration. Mutations in this gene are a cause of Noonan

syndrome as well as acute myeloid leukemia. [provided by RefSeq, Aug 2016]

Synonyms: BPTP3; CFC; JMML; METCDS; NS1; PTP-1D; PTP2C; SH-PTP2; SH-PTP3; SHP2

Protein Families: Druggable Genome, Phosphatase

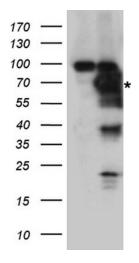

Protein Pathways: Adipocytokine signaling pathway, Chronic myeloid leukemia, Epithelial cell signaling in

Helicobacter pylori infection, Jak-STAT signaling pathway, Leukocyte transendothelial

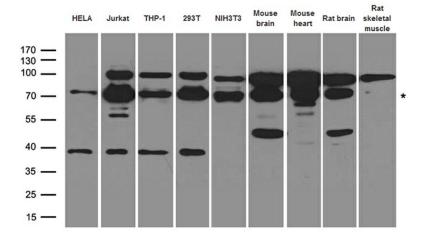

migration, Natural killer cell mediated cytotoxicity, Neurotrophin signaling pathway, Renal cell

carcinoma

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY PTPN11 ([RC220029], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-PTPN11 rabbit polyclonal antibody.

Western blot analysis of extracts (35ug) from different cell lines and tissues by using anti-PTPN11 rabbit polyclonal antibody.
