epithelial Sodium Channel alpha (SCNN1A) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: WE

Recommended Dilution: WB: 1:500~2000

Reactivity: Human

Host: Rabbit

Isotype: IgG

Clonality: Polyclonal

Immunogen: Recombinant protein of human SCNN1A

Formulation: PBS with 0.02% sodium azide, 50% glycerol, pH7.3

Concentration: 1.93 mg/ml

Purification: Purified from the immunized serum by affinity chromatography (Protein A/G)

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 75.5 kDa

Gene Name: sodium channel epithelial 1 alpha subunit

Database Link: NP 001029

Entrez Gene 6337 Human

P37088

Background: Nonvoltage-gated, amiloride-sensitive, sodium channels control fluid and electrolyte

transport across epithelia in many organs. These channels are heteromeric complexes consisting of 3 subunits: alpha, beta, and gamma. This gene encodes the alpha subunit, and mutations in this gene have been associated with pseudohypoaldosteronism type 1 (PHA1), a rare salt wasting disease resulting from target organ unresponsiveness to mineralocorticoids. Alternatively spliced transcript variants encoding different isoforms have been described for

this gene. [provided by RefSeq, Apr 2009]

Synonyms: BESC2; ENaCa; ENaCalpha; SCNEA; SCNN1

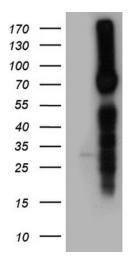

Protein Families: Druggable Genome, Ion Channels: Other, Transmembrane

Protein Pathways: Taste transduction

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY SCNN1A (Cat# [RC228555], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-SCNN1A antibody(Cat# [TA890149]). Positive lysates [LY422000] (100ug) and [LC422000] (20ug) can be purchased separately from OriGene.
