PKMYT1 Human shRNA Plasmid Kit (Locus ID 9088)

Product data:

Product Type: shRNA Plasmids

Product Name: PKMYT1 Human shRNA Plasmid Kit (Locus ID 9088)

Locus ID: 9088

Synonyms: MYT1; PPP1R126

Vector: pRFP-C-RS (TR30014)

E. coli Selection: Chloramphenicol (34 ug/ml)

Mammalian Cell

Selection:

Puromycin

Format: Retroviral plasmids

Components: PKMYT1 - Human, 4 unique 29mer shRNA constructs in retroviral RFP vector(Gene ID = 9088).

5µg purified plasmid DNA per construct

29-mer scrambled shRNA cassette in pRFP-C-RS Vector, TR30015, included for free.

RefSeq: NM 001258450, NM 001258451, NM 004203, NM 182687, NM 182687.1, NM 182687.2,

NM 004203.1, NM 004203.2, NM 004203.3, NM 004203.4, NM 001258450.1,

NM 001258451.1, BC121161, BC121162, BC130011, BC153823, BC160025, NM 001258450.2,

NM 182687.3, NM 004203.5, NM 001258451.2

UniProt ID: 099640

Summary: This gene encodes a member of the serine/threonine protein kinase family. The encoded

protein is a membrane-associated kinase that negatively regulates the G2/M transition of the cell cycle by phosphorylating and inactivating cyclin-dependent kinase 1. The activity of the encoded protein is regulated by polo-like kinase 1. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. [provided by RefSeq, May

2012]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u>.

Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
