FCRL1 Human shRNA Plasmid Kit (Locus ID 115350)

Product data:

Product Type: shRNA Plasmids

Product Name: FCRL1 Human shRNA Plasmid Kit (Locus ID 115350)

Locus ID: 115350

Synonyms: CD307a; FCRH1; IFGP1; IRTA5

Vector: pGFP-V-RS (TR30007)

E. coli Selection: Kanamycin

Mammalian Cell Puromycin

Selection:

Format:

Retroviral plasmids

Components: FCRL1 - Human, 4 unique 29mer shRNA constructs in retroviral GFP vector(Gene ID = 115350).

5µg purified plasmid DNA per construct

29-mer scrambled shRNA cassette in pGFP-V-RS Vector, TR30013, included for free.

RefSeq: NM 001159397, NM 001159398, NM 052938, NM 052938.1, NM 052938.2, NM 052938.3,

NM 052938.4, NM 001159397.1, NM 001159398.1, BC033690, BC033690.1, BC021274,

NM 001159398.2, NM 052938.5, NM 001159397.2

UniProt ID: Q96LA6

Summary: This gene encodes a member of the immunoglobulin receptor superfamily and is one of

several Fc receptor-like glycoproteins clustered on the long arm of chromosome 1. The

encoded protein contains three extracellular C2-like immunoglobulin domains, a

transmembrane domain and a cytoplasmic domain with two immunoreceptor-tyrosine activation motifs. This protein may play a role in the regulation of cancer cell growth.

Alternative splicing results in multiple transcript variants. [provided by RefSeq, Apr 2009]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact $\underline{\mathsf{techsupport}} \underline{\mathsf{oorigene.com}}.$

If you need a special design or shRNA sequence, please utilize our custom shRNA service.

Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
